<i>Preface</i>	<i>page xi</i>
1 Introduction	1
References	8
2 Meiosis and genetic recombination	9
2.1 The life cycle and the ploidy level	9
2.2 Two types of cell division	10
2.3 Two sexes or mating types	10
2.4 Meiosis	11
2.5 Following two loci in meiosis	13
Interchromosomal recombination	13
Intrachromosomal recombination	14
2.6 Recombination frequency	17
Crossover interference	17
Recombination frequency and physical distance	18
2.7 Polyploidy	18
2.8 Sex chromosomes	19
References	19
3 Estimation of recombination frequencies	21
3.1 What do we observe? From separate loci to pairs, from phenotype to genotype	21
Genotype and phenotype notation	23
3.2 The backcross	23
Estimation with the method of maximum likelihood	26
The likelihood ratio and the <i>LOD</i>	27
The variance of the estimator \hat{r} in the backcross	28
Doubled haploids	28
3.3 The F_2	29
The F_2 with dominance	33
One marker with a dominant allele	33
Coupling phase	34

Repulsion phase	35
Practical consequences of dominance	36
3.4 Advanced population types	37
Exercises	39
References	44
4 Determination of linkage groups	45
4.1 Why determine linkage groups and how?	45
4.2 Test for independent segregation	46
Example	48
Generalization	48
4.3 Test for the recombination frequency being equal to $\frac{1}{2}$	49
Example	50
Generalization	50
4.4 Some caution	51
4.5 Grouping algorithm	52
4.6 Determining the linkage groups in practice	53
Exercises	56
References	57
5 Estimation of a genetic map	59
5.1 Recombination frequencies and distances	59
5.2 An example experiment	63
5.3 Map estimation by linear regression	65
Missing genotype observations	68
Crossover interference	68
5.4 Map estimation by maximum likelihood	69
Missing genotype observations	71
Crossover interference	72
Exercises	72
References	75
6 Criteria for the evaluation of maps	77
6.1 Introduction	77
6.2 Log-likelihood	78
6.3 Sum of <i>LODs</i> of adjacent segments	79
6.4 Sum of recombination frequencies in adjacent segments	80
6.5 Residual sum of squares	81
6.6 χ^2 Goodness of fit	82
Exercises	83
7 How to find the best map order	87
7.1 Introduction	87

7.2	The travelling salesman problem	88
7.3	Optimization algorithms	90
7.4	Greedy algorithms	91
7.5	Simulated annealing	92
7.6	Tabu search	93
7.7	Evolutionary algorithms	94
7.8	Ant colony optimization	95
7.9	Distance geometry	96
7.10	Final remarks	96
	Exercise	96
	References	98
8	Outbreeding species	101
8.1	Introduction	101
8.2	Segregation type and linkage phases	102
8.3	Two-way pseudo-testcross strategy	106
	Linkage phase determination in the pseudo-testcross	108
8.4	Estimation of the pairwise recombination frequency in the full-sib family	110
	Linkage phase determination in the full-sib family	111
8.5	Simultaneous estimation of the separate parental recombination frequencies	112
	Example	114
	Multipoint estimation	116
8.6	Map estimation	117
	Exercises	119
	References	120
9	Mapping in practice	123
9.1	Introduction	123
9.2	Model assumptions	124
9.3	Observation errors	125
9.4	Phenotype and genotype	127
9.5	Missing observations	128
9.6	Pre-mapping diagnostics	129
	Phenotype frequencies	129
	Segregation ratio	129
	Identical loci and individuals	131
	Pairwise recombination frequencies	131
9.7	Post-mapping diagnostics	132
	Segregation distortion	132
	Number of recombinations per individual	132
	Phenotype probabilities and graphical genotypes	133

Stress	134
Model fit	135
Plausible map orders	136
References	137

**Third international
symposium on
Pear growing**

Corvallis, Oregon, U.S.A.
29-31 July 1981

CONTENTS

	Page
Alphabetical list of authors	6
List of participants	7
Introductory Remarks: A History of Pear Growing in Oregon and the Northwest. M. N. Westwood	11
Session 1: Pear Genetics, Germplasm, Rootstock Propagation and Evaluation, and Cultivar Evaluations.	
Pear genetics and germplasm - priorities for breeding. R. L. Bell	13
Culture of 'Bartlett' on its own roots, comparison with Quince, and French seedling rootstocks. B. Thibault* and L. Hermann	21
Flower bud survival of pear cultivars following a spring frost. R. C. Lamb	27
Hybridizing pears for fire-blight resistance or tolerance. K. Ryugo	33
Asexual embryogenesis in pear. J. Janick	37
General observations on pear culture in Quebec in connection with long-term cultivar and selection evaluation trials. R. Granger	43
Precocity of 'Swiss Bartlett' pear on clonal and seedling rootstocks. L. G. Denby and M. Meheriuk*	51
Pear germplasm of the new national clonal repository: its evaluation and uses. M. N. Westwood	57
Session 2: Pear diseases: Fire blight, antagonistic bacteria, pear decline, virus status, and storage rots.	
Current status of pear virus diseases in North America. P. R. Fridlund	67
The effect of relative humidity on spore germination of pear decay fungi and on d'Anjou pear decay. R. A. Spotts* and B. B. Peters	75
Session 3: Pear insect-pest management of pears.	
An overview of pear pests in Western U. S. A. E. C. Burts.	79

Mediterranean fruit fly, <i>Ceratitus capitata</i> Wiedemann, in California - eradication or disaster. J. L. Joos	83
A perspective for understanding anthropod community organization and development in pear. W. J. Liss*, L. J. Gut, P. H. Westigard, and C. E. Warren	85
Variation in pear psylla (<i>Psylla pyricola</i> Foester) densities in southern Oregon orchards and its implications. L. J. Gut*, C. Jochums, P. H. Westigard, and W. J. Liss	101
 Session 4: Pear nutrition and soil management.	
Cork spot of d'Anjou pear fruit in relation to critical calcium concentration and other mineral interactions. D. G. Richardson and A. M. Al-Ani	113
Calcium sprays to control physiological disorders of d'Anjou pears. J. T. Raese* and E. A. Stahly	119
Determination of critical levels of mineral nutrients in pear leaves. R. L. Stebbins	125
 Session 5: Pollination and growth regulators for controlling pear cropping.	
Growth regulators in pear cropping. A. Nicotra	131
Some factors affecting fruit set of 'Packham's Triumph'. H. J. van Zyl, and D. K. Strydom*	149
Floral initiation in pear varieties. M. Carrera	157
Increased fruit set and cropping of 'Comice' pear trees with ethylene inhibitor, amino-ethoxyvinylglycine. P. B. Lombard and D. G. Richardson	165
 Session 6: Orchard design, training and pruning systems.	
Special considerations in orchard design, training and pruning systems for pear trees. P. B. Lombard	171
 Session 7: Production and Marketing Trends: Invited speakers from the Industry.	

Production and trends of major pear cultivars in the western states of California, Oregon, and Washington. J. Klahre	177
Handling and marketing of pear grown in the western United States. M. Martinez	187
Session 8: Preharvest conditioning, post harvest treatments, storage, and marketing of pears.	
Calcium and nitrogen effects on d'Anjou pear fruit respiration and ethylene evolution. D. G. Richardson* and A. M. Al-Ani, Corvallis, OR, U.S.A.	195
Maturity, chilling requirements and dessert quality of Anjou and Bosc pears. P. N. Chen* and W. M. Mellenthin, Hood River, OR, U.S.A.	203
Conclusion and Farewell Session: Planning for future conferences on pear growing. P. Larsen	211
*Asterisks indicate the authors who presented papers with multiple authorship.

Fifth International Symposium on Pear Growing

Editor
M. Carrera

Zaragoza, Spain
24-27 May 1988

CONTENTS

	Page
Alphabetical list of authors	7
List of participants	9
From the Editor	15
Opening address. S. Sansavini, Italy and B. Thibault, France	17
<u>Varieties, rootstocks and propagation</u>	
First information about two asian pear collections in France. B. Thibault, A. Masseron, A. Belouin and E. Dalle. France	23
Performance of autumn and winter pear varieties in the middle Ebro basin. M. Carrera. Spain	35
Selection of pear seedlings (<u>P. communis</u> L.) as potential clonal rootstocks: Preliminari data. D. Bassi, B. Marangoni and D. Barnabé. Italy	43
Evaluation of some clonal quince rootstocks in calcareous soil. R. Viti and F. Cinelli. Italy	53
Comercial in vitro micropropagation of pear cv. Conference. J.A. Baviera, J.L. Garcia and M. Ibarra. Spain	63
Performance of micropropagated and budded pear trees: Interaction between scion and dwarf-quince clones. D. Neri, S. Sansavini and M. Capobianco. Italy	69
Topgrafting early pear varieties with Passa Crassana. Compatibility problems. F. Gil-Albert, A. Perez de Oteyza and J.R. Lissarrague. Spain	77
The grafting performance of pear. L. Rivalta and M.L. Maltoni. Italy	85
First results on growth and cropping of pear trees budded at different heights. A. Blanco. Spain	93
Evolution of pear growing in the Loire Valley (France) Y. Guiheneuf. France	99
<u>Genetics and physiology</u>	
Dwarfing in pear. G.L. Bagnara and L. Rivalta. Italy	103
Isoenzymatic variability in pear pollen. M. Cerezo and R. Socias. Spain	111
Acta Horticulturae 256, 1989 Pear Growing	3

Photosynthetic pigments in young non-bearing pear and quince trees. J. Val, M.A. Moreno, M.C. Tabuenca and E. Monge. Spain	119
Fruit shape as a response to time of GA ₃ treatment in 'Agua de Aranjuez' pear. M. Herrero. Spain	127
Cold damage in fruit bud tissues of pear. N. Filiti and D. Neri. Italy	133

Diseases, pests and breeding for fire blight resistance

Effect of some virus diseases on the performance of two clones of 'Agua de Aranjuez' pear. R. Gella. Spain	137
On the role of <u>Pseudomonas syringae</u> pv. <u>syringae</u> in blast of pear trees in Catalunya, Spain. E. Montesiños and P. Vilardell. Spain	143
Integrated pest management of <u>Psylla pyri</u> in pear orchards of Gerona, Spain. M. Vilajeliu. Spain	153
Evolution and control of <u>Psylla pyri</u> in the fruit growing area of Lerida (Cataluña, Spain). I. Franco. Spain	159
Important control measures to prevent or reduce fire blight damage in new locations. T. van der Zwet. USA (Abstract)	163
Evaluation of <u>Pyrus</u> germplasm collected in Eastern Europe for fire blight resistance. T. van der Zwet and R. Bell. USA (Abstract)	164
Evaluation of advanced USDA pear selections for fruit quality and fire blight resistance. R.L. Bell and T. van der Zwet. USA (Abstract)	166
Fire blight in the Eastern Mediterranean. E. Shabi. Israel (Abstract)	167
Pear scab: Epidemiology, control and resistance of <u>Venturia pirina</u> to fungicides. E. Shabi. Israel (Abstract)	168

Nutrition and soil management

Nutritional situation of pear orchards affected by late frosts. L. Montañes, M. Sanz and L. Heras. Spain	169
Pear yellownes: An atypical form of iron chlorosis?. A. Abadia, M. Sanz, J. de las Rivas and J. Abadia. Spain	177

Effect of fertilizers, rootstocks and season on fruit quality fruit disorders and mineral composition of d'Anjou pears. J.T. Raese and D.C. Staiff. USA	183
Influence of the soil management system on pear growing and production and orchard weed flora. J. Gomez and C. Zaragoza. Spain	189
<u>Preharvest treatments, harvest dates, storage and marketing</u>	
Enhanced resistance to postharvest decay in Bosc pears treated with Calcium chloride. D. Sugar. USA	201
Correlations between time of picking, ethylene production and other ripening indices at harvesting in 'Abate' and 'Packam's T.' pears. A. Rizzolo, P. Eccher and F. Gorini. Italy	205
The effect of harvest date on 'Flor de Invierno' pears in cold storage. D.I. Recasens, J. Roig and J. Graell. Spain	213
Ethylene levels of 'Blanca de Aranjuez' pears in low-oxygen atmosphere storage. C. Merodio and J.L. de la Plaza. Spain	223
Harvest sequence, storage life and marketing periods for red pear cultivars in the Pacific Northwest region of the United States. D. Sugar and P.B. Lombard USA	231

LIST OF CONTENTS

Prefaces	7
List of Contents	9
List of Authors	25
List of Participants	31
GERMPLASM AND GENETIC IMPROVEMENT	
Olive Germplasm Development Past and Present Approach to Genetic Improvement <i>S. Lavee and B. Avidan</i>	47
Characterisation of Local Olive (<i>Olea europaea</i> L.) Accessions by Oil Composition, Morphological and Molecular Markers Methods <i>D. Bassi, D. Tura, F. Geuna, O. Failla and S. Pedò</i>	57
Isolation and Characterisation of Microsatellite DNA in Olive (<i>Olea europaea</i> L.) <i>T. Marrazzo, G. Cipriani, R. Marconi, R. Testolin and A. Cimato</i>	61
Establishing a Database of DNA Fingerprints to Identify Olive Cultivars <i>G. Collins, M. Sedgley and G. Mekuria</i>	65
Application of Microsatellite Markers in Olive Breeding <i>P. Rallo, G. Dorado and A. Martin</i>	69
Use of AFLP to Characterize Apulian Olive Varieties (<i>O. europaea</i> L.) <i>P. Resta, C. Lotti, G. Fanizza, A. Godini, R. Mariani and M. Palasciano</i>	73
RAPD and AFLP Analysis for Olive Mapping <i>R. De la Rosa, A. Martin, L. Rallo, A. Angiolillo, C. Guerrero and L. Baldoni</i>	79
RAPD's Analysis Support the Autochthon Origin of Olive Cultivars <i>A. Belaj, I. Trujillo and L. Rallo</i>	83
The Use of RAPD Markers for the Study of Olive Germplasm from Apulia and Basilicata <i>E. Perri, A. Palopoli and M. Pellegrino</i>	87
Identification of Some Turkish Olive Cultivars by Using RAPD-PCR Technique <i>E. Ergulen, M.T. Ozkaya, S. Ulger and N. Ozilbey</i>	91
Molecular Markers for Cultivar Characterisation in <i>Olea europaea</i> <i>R. Bernardi, M. Manzo, M. Durante, R. Petruccelli and G. Bartolini</i>	97
Multivariate Analysis of the Tuscan Olive Germplasm <i>C. Cantini, A. Cimato and G. Sani</i>	101
Olive Genetic Improvement: Thirty Years of Research <i>E. Bellini, E. Giordani, M.V. Parlati and S. Pandolfi</i>	105

Medium- and Long-Term in vitro Conservation of Olive Germplasm (<i>Olea europaea</i> L.) <i>M. Lambardi, C. Benelli, A. De Carlo, A. Fabbri, S. Grassi and P.T. Lynch</i>	109
Behaviour of Ten Mediterranean Olive Cultivars in the Northeast of Spain <i>J. Tous, A. Romero, J. Plana and J.F. Hermoso</i>	113
Identifying <i>Chemlali</i> Olive Variety in its Traditional Area <i>M. Khlif, M. Ayadi, N. Grati-Kammoun, M.N. Arous, H. Rekik, M.T. Hamdi and B. Rekik-Fakhfakh</i>	117
Advances in the Study of Wild Olive Genetic Resources <i>M. Mulas, E. Cauli and A.H.D. Francesconi</i>	121
Analytical Characteristics of the Virgin Olive Oils from Three New Genotypes Obtained at Florence by Cross-Breeding <i>E. Bellini, E. Giordani, A. Ranalli, S. Contento and M.V. Parlati</i>	125
Analytical Methods for Brines and Fruits of <i>Olea europaea galega</i> cv <i>S. Silva, M.L. Gomes, L. Vilas-Boas, L. Catulo and C. Peres</i>	129
Characterisation of Olive (<i>Olea europaea</i> L.) Cultivars by RAPD Markers <i>D. Bandelj, J. Jakše and B. Javornik</i>	133
Characterizing Isozymes of Some Tunisian Olive (<i>Olea europaea</i> L.) Cultivars <i>N. Grati Kamoun, N. Ouazzani and A. Trigui</i>	137
Classification of Olive Trees According to Fruit and Oil Characterisation <i>H. Fourati, M. Cossentini, B. Karray and M. Khlif</i>	141
Clonal Selection of Olive Tree Variety "Chemlali Sfax": Preliminary Results <i>N. Grati Kamoun, M. Khlif, M. Ayadi and B. Karray</i>	147
Edaphic Characteristics of Olive-Tree Areas in the Trás-Os-Montes Region (Portugal): a Map-Based Approach <i>T. de Figueiredo, A. Almeida and J. Araújo</i>	151
Evaluation Data from an Olive Germplasm Collection <i>I. Chessa, C. Sirca and G. Nieddu</i>	155
Evaluation of the Olive Germplasm in the Apulia Region: Biological and Technological Characteristics <i>E. Ferrara, G. Papa and F. Lamparelli</i>	159
Genetic Characterization of Olive Tree (<i>Olea europaea</i> L.) Intended for Oil Production in Corsica <i>V. Bronzini de Caraffa, D. de Rocca Serra, J. Giannettini, J. Maury and G. Besnard</i>	163
Genetic Diversity of Olives Grown along the Coast of Montenegro <i>B. Lazović, R. Bosković, C. James, K.R. Tobutt and K. Gasić</i>	167

Genotype-Environment-Year Interaction on Oil Antioxidants in an Olive District of Northern Italy <i>O. Failla, D. Tura and D. Bassi</i>	171
Intra-Variability of the Portuguese Olive Cultivar Galega Vulgar Expressed by RAPD, ISSR and SPAR <i>V.J.V. Gemas, M.J. Rijo-Johansen and P. Feveireiro</i>	175
Olive Cross Breeding Studies at Yalova – ACHRI <i>E. Yalçinkaya, N. Kaynaş, A.R. Sütçü and A.E. Fidan</i>	179
Olive Genetic Improvement: Variability within the Progeny “Picholine x Grossanne” <i>E. Bellini, E. Giordani, M.V. Parlati, S. Pandolfi and E. Perri</i>	183
Olive Variety Trial in Marmara Region <i>N. Kaynaş, A.R. Sütçü and A.E. Fidan</i>	187
“Piantone di Mogliano”: an Interesting Olive Variety with Moderate Growth Suitable for Intensive Cultivation <i>B. Alfei, A. Santinelli and G. Pannelli</i>	191
Pollen Viability in Several ‘Arbequina’ Olive Oil Clones <i>M. Rovira and J. Tous</i>	197
Repeatedly Reported but Hitherto Undescribed Olive Cultivars Native to Southern Italy <i>A. Godini, R. Mariani, A. Pacifico and M. Palasciano</i>	201
Selection on Olive Progenies Based on Earliness of Bearing and Fruit Oil Content <i>L. León and L. Rallo</i>	205
Self-Fertility and Inter-Compatibilities of Sixteen Olive Varieties <i>N. Moutier</i>	209
Study of the Sterolic Fraction of Some Free Crossbreeding Olive Cultivars <i>H. Fourati, M. Cossentini and M. Khlif</i>	213
The Bosana as a Cultivar for Intensive Olive Growing <i>G. Bandino, C. Moro, P. Sedda and M. Mulas</i>	217
Three New Olive Cultivars obtained by Cross-Breeding <i>E. Bellini, E. Giordani and M.V. Parlati</i>	221
Two New Clones of Cultivar ‘Leccino’ <i>S. Bartolini, R. Guerriero, F. Loreti and M. Saponari</i>	225
Variability and Classification of Olive Cultivars by Their Vigor <i>C. del Río, M.D. García-Fernández and J.M. Caballero</i>	229
Varietal Structure of Moroccan Olive Germplasms: Evidence from Genetic Markers and Morphological Characteristics <i>N. Ouazzani, A. Idrissi, N. El Ghazi and R. Lumaret</i>	233

CROP MANAGEMENT

Olive Orchard Management: Advances and Problems <i>N. Michelakis</i>	239
The Effect of Clonal Rootstocks on Frost Tolerance and on Some Aspects of Plant Behaviour in Moraiolo and S. Felice Olive Cultivars <i>G. Pannelli, S. Rosati and E. Rugini</i>	247
Effects of Foliar Application of Urea on Olive Leaf Nitrogen, Growth, and Yield <i>J.H. Connell, L. Ferguson, P.D. Metheney, H. Reyes, W.H. Krueger and G.S. Sibbett</i>	251
Soil Water Availability and Relationship between Canopy and Roots in Young Olive Trees (cv Coratina) <i>B. Dichio, M. Romano, V. Nuzzo and C. Xiloyannis</i>	255
Regulated Deficit Irrigation in Olive Trees (<i>Olea europaea</i> L. cv. Arbequina) for Oil Production <i>S. Alegre, J. Marsal, M. Mata, A. Arbonés, J. Girona and M.J. Tovar</i>	259
Monopotassium Phosphate (PO ₄ H ₂ K) for Olive Fruit Abscission <i>D. Barranco, C.C. de Toro, M. Oria and H.F. Rapoport</i>	263
Effect of Spray Solution Concentration, Active Ingredient, Additives and Sequential Treatments of Napthalene Acetic Acid for Chemical Thinning of Manzanillo Table Olives (<i>Olea europaea</i>) <i>W.H. Krueger, Z. Heath and B. Mulqueeny</i>	267
Irrigation Regime Affects Yield and Oil Quality of Olive Trees <i>R. d'Andria, G. Morelli, M. Patumi and G. Fontanazza</i>	273
Young Olive Trees Responses (<i>Olea europaea</i> , cv "Arbequina") to Different Water Supplies - Water Function Determination <i>J. Girona, M. Luna, A. Arbonés, M. Mata, J. Rufat and J. Marsal</i>	277
Effect of Mechanical Pruning on California Black Ripe (<i>Olea europaea</i> L.) cv. 'Manzanillo' Table Olive Yield <i>L. Ferguson, W.H. Krueger, H. Reyes and P.D. Metheney</i>	281
Effect of the Climate and the Soil Conditions on Crops Performance of the "Chemlali de Sfax" Olive Trees <i>B. Ben Rouina, A. Trigui and M. Boukhris</i>	285
Influence of Canopy Density on Efficiency of Trunk Shaker on Olive Mechanical Harvesting <i>A. Tombesi, M. Boco, M. Pilli and D. Farinelli</i>	291
Mechanical Pruning of Olive Trees as an Alternative to Manual Pruning <i>J.O. Peça, A.B. Dias, A.C. Pinheiro, L. Santos, N. Morais, A.G. Pereira and D. Reynolds de Souza</i>	295

Studies on the Relationship between Late Ripening and the Nutrition of Olive Variety “ <i>Gemlik</i> ” in the Marmara Region <i>S. Soyergin, C. Genç and A.E. Fidan</i>	301
Modern Analytical Methodologies in Olive Growing <i>A. De Nino, F. Mazzotti, G. Sindona, N. Lombardo, E. Perri and E. Urso</i>	305
Apulian Traditional Olive Training Systems <i>A. Godini</i>	311
Relationship among Flowering, Fruitfulness and Crop in ‘Manzanilla de Sevilla’ Olives <i>M. Ramírez-Santa Pau, C. Navarro and L. Rallo</i>	317
Effect of a Hard Pruning on Trees Vigor and Yields of Old Olive Orchards <i>B. Ben Rouina, A. Omri and A. Trigui</i>	321
Effect of Irrigation Strategies Applied on Olive Tree (<i>Olea europaea</i> L.) on Oil Pigment Content and Colour <i>M.P. Romero, M.J. Tovar, M.J. Motilva, M. Luna and J. Girona</i>	325
Effect of Nitrogen and Magnesium Application on Yield and Leaf-N and Mg Concentrations of Olive Trees cv. Picual <i>M.E. Marcelo, P.V. Jordão, J.C. Soveral-Dias, H. Matias and B. Rogado</i>	329
Effect of Regeneration Pruning for the Recovery of Olive Productivity and Fruit Characteristics in Ten Olive Cultivars <i>I. Metzidakis</i>	333
Effect of the Nitrogen and Potassium Fertilization on Fatty Acids Composition and Oxidative Stability for ‘Carrasquenha’ Cultivar Olive Oil at Different Harvest Periods – Preliminary Study <i>P. Simões, C. Pinheiro-Alves, A.M. Cordeiro and M.E. Marcelo</i>	337
Effect of Variable Water Irrigation Supply in Olive (<i>Olea europaea</i> L.) cv. Arbequina in Aragón (Spain). I. Fruit and Oil Production <i>J.M. Faci, M.J. Berenguer, J.L. Espada and S. Gracia</i>	341
Evolution of Oil Accumulation and Polyphenol Content in Fruits of Olive Tree (<i>Olea europaea</i> L.) Related to Different Irrigation Strategies <i>M.J. Motilva, M.J. Tovar, M.P. Romero, S. Alegre and J. Girona</i>	345
Effect of Tree Growth and Nutrients Status of “Chemlali de Sfax” Olive Trees and Their Productivity <i>B. Ben Rouina, A. Trigui and M. Boukhris</i>	349
First Observations Regarding Oil Accumulation and Other Phenological Aspects within the New Olive Production Zone of Catamarca, Argentina <i>L.M. Ravetti, A.C. Matías, M. Patumi, P. Rocchi and G. Fontanazza</i>	353
Influence of Trunk or Bough Shaking on the Performance and Costs of Mechanical Harvesting of Olives <i>J. Peça, A.B. Dias, A.C. Pinheiro, A. Almeida, L. Santos, D. Reynolds and J. Lopes</i>	357

Managing of a Traditional Olive Orchard by Timesaving Biennial Pruning <i>C. Cantini and M. Panicucci</i>	361
Mechanical Harvesting of “Chemlali de Sfax” Olive-Trees <i>H. Bentaher and B. Ben Rouina</i>	365
Nitrogen, Boron, and Potassium Dynamic in “On” vs “Off” Cropped Manzanillo Olive Trees in California, USA <i>G.S. Sibbett and L. Ferguson</i>	369
Nutrient Status of Olives Grown in the Marmara Region <i>S. Soyergin, I. Moltay, Ç. Genç, A.E. Fidan and A.R. Sutçu</i>	375
Olive Response to Foliar Boron Application <i>S. Perica, P.H. Brown, J.H. Connell and H. Hu</i>	381
Olives in Australia <i>S.G. Kailis and S. Sweeney</i>	385
Olive Vegetable Water Spreading and Soil Fertilization <i>L. Di Giovacchino, C. Basti, N. Costantini and G. Surricchio</i>	389
Optimal Harvesting Period for ‘Arbequina’ Olive Cultivar in Catalonia (Spain) <i>A. Romero, I. Díaz and J. Tous</i>	393
Results of a Chemical Weed Control Trial in an Oil Olive Orchard <i>P. Montemurro, M. Fracchiolla, D. Guarini and C. Lasorella</i>	397
Sap Flow Estimated by Compensation Heat-Pulse Velocity Technique in Olive Trees under Two Irrigation Regimes in Southern Italy <i>P. Giorio and R. d’Andria</i>	401
Studies on Nutrient Contents and Seasonal Element Fluctuations of the Olive Variety Gemlik in Bursa Area <i>S. Soyergin and A.V. Katkat</i>	405
Use of Monopotassium Phosphate (MKP) as Leaf Fertiliser in the Olive <i>O. Arquero, C. Navarro, D. Barranco and C. De Toro</i>	409
The Concentration of Mineral Elements in the Leaves, Stems and Roots of Six Olive Cultivars under Saline and Normal Irrigation Regimes <i>M.H. Loupassaki, K.S. Chartzoulakis, N.B. Dagalaki and I.I. Androulakis</i>	411
The Influence of Some Agronomic Parameters on the Efficiency of Mechanical Harvest on Young Olive Trees <i>P. Proietti, F. Famiani, L. Nasini and A. Tombesi</i>	415
The Response of Young Potted Olive Plants cv. ‘Zard’ to Water Stress and Deficit Irrigation <i>K. Arzani and I. Arji</i>	419
Stem Places and Supporting Frames Suitability for «Dendrometers» Installation on Olive Tree <i>N. Michelakis and E.A. Barbopoulou</i>	423

The Effect of Nitrogen Overfertilization on Olive Tree Growth and Oil Quality <i>R. Fernández-Escobar, M.A. Sánchez-Zamora, M. Uceda, G. Beltran and M.P. Aguilera</i>	429
BIOLOGY AND PHYSIOLOGY	
Physiological and Biochemical Remarks on Environmental Stress in Olive (<i>Olea europaea</i> L.) <i>C. Vitagliano and L. Sebastiani</i>	435
Obtaining Salt (NaCl) Tolerant Olive Plants: I) Some Physiological and Anatomical Characteristics of Olive Plants Growing in Harsh Saline Zones <i>M. Cantos, J. Troncoso, J. Liñán, A. Troncoso and H. Rapoport</i>	441
Physiological and Biochemical Reactions of Olive Genotypes during Site-Relevant Ozone Exposure <i>L. Sebastiani, A. Minnocci, F. Scebba, C. Vitagliano, A. Panicucci and G. Lorenzini</i>	445
Foliar Responses of Olive Trees (<i>Olea europaea</i> L.) under Field Exposure to Elevated CO ₂ Concentration <i>R. Tognetti, L. Sebastiani, A. Minnocci, C. Vitagliano and A. Raschi</i>	449
Mineral Nutrient Uptake from the Soil in Irrigated Olive Trees, Cultivar Coratina, over Six Years after Planting <i>C. Xiloyannis, G. Celano, A.M. Palese, B. Dichio and V. Nuzzo</i>	459
Transpiration and Photosynthesis of the Olive Tree: a Model Approach <i>A. Díaz-Espejo, B. Hafidi, J.E. Fernandez, M.J. Palomo and H. Sinoquet</i>	457
Translocation of Newly-Assimilated Carbon in the Vegetative Shoot of Olive <i>R. Gucci and P.E.H. Minchin</i>	461
Expression of Ole E 1, the Major Olive Pollen Allergen, during in-vitro Pollen Germination <i>M. M'rani-Alaoui, A.J. Castro, J.D. Alché, W. Wang, M.C. Fernández and M.I. Rodríguez-García</i>	465
Reduced Ovule Longevity Increases Cross-Pollination Response in Olive <i>A. Quero, V. Pinillos and J. Cuevas</i>	469
Frost Tolerance Induced by Cold Acclimation in Olive (<i>Olea europaea</i> L.) <i>F. Bartolozzi, F. Cerquaglia, L. Coppari and G. Fontanazza</i>	473
Flower Anomalies in <i>Olea europaea</i> cv. Santulhana <i>M.C. Medeira, M.I. Maia, S. Narane, M.C. Serrano, F. Leitão, J. Lopes and M. Santos</i>	479
Olive Seed Set and its Impact on Seed and Fruit Weight <i>J. Cuevas and R. Oller</i>	485

The Secoiridoid Biophenols of <i>Olea europea</i> L. Drupes and the Role of their Metabolites <i>N.A. Uccella</i>	489
Bioclimatology of Olive: Effects of Climatic Conditions on Flower Biology <i>C. Briccoli Bati, B. Filippucci and D. Monardo</i>	493
Comparative Study on NaCl Salinity Tolerance of Six Olive Cultivars <i>K. Chartzoulakis, M. Loupassaki and I. Androulakis</i>	497
Effect of Soil Texture on Root Hydraulic Conductivity in <i>Olea europaea</i> L. cv. "Nocellara del Belice" Potted Trees <i>A. Motisi and G. Gullo</i>	503
Fruit Growth and Olive Oil Quality in Relation to Foliar Nutrition and Time of Application <i>P. Inglese, G. Gullo and L.S. Pace</i>	507
Growth, Photosynthesis, and Water status of Olive Plants Resprouting after the Elimination of the Canopy <i>C. Cantini, R. Tognetti and R. Gucci</i>	511
Biomolecular Characterisation and Histological Distribution of Biophenols in Green Mature Fruit of <i>Olea europea</i> Cassanese cv. <i>M.B. Bitonti, A. Chiappetta, A.M. Innocenti and N. Uccella</i>	515
Observations on the Fertilization Process in Self-Pollinated Flowers of Cultivar "Leccino" <i>S. Bartolini, R. Viti and R. Guerriero</i>	521
Preliminary Investigation of Endogenous Gibberellins in Seeds of Olive Fruits (cv Coratina) <i>A.M. Palese and S.J. Croker</i>	525
β -Glucosidase Releasing of Phytoalexin Derivatives from Secobiophenols as Defense Mechanism against Pathogenic Elicitors in Olive Drupes <i>S. Mazzuca and N. Uccella</i>	529
Quality Olive Oils Production in Basilicata Region: Chemical Characteristics Investigations <i>N. Montemurro, P. Benedetto, G. Lacertosa, V. Castoro and S. Martelli</i>	533
Some Biochemical Differences between Juvenile and Young Olive Plant Material <i>J.L. García, R. Sarmiento and A. Troncoso</i>	537
Stomatal Characteristics of Two Olive Cultivars "Frantoio" and "Leccino" <i>R. Gucci, A. Grimelli, G. Costagli, R. Tognetti, A. Minnocci and C. Vitagliano</i>	541
Study of Flower Biology and Pollen Tube Growth of Mature Olive Tree cv. 'Zard' <i>K. Arzani and T. Javady</i>	545

OLIVE AND OIL TECHNOLOGY

- Relationships between Phenolic Composition of Olive Fruit and Olive Oil: the Importance of the Endogenous Enzymes (keynote speech) 551
G. Montedoro, M. Baldioli, R. Selvaggini, A.L. Begliomini, A. Taticchi and M. Servili
- The Use of Biotechnology Means During Oil Mechanical Extraction Process: Relationship with Sensory and Nutritional Parameters of Virgin Olive Oil Quality 557
M. Servili, R. Selvaggini, A. Taticchi, M. Baldioli and G.F. Montedoro
- The Analytical Pattern of Virgin Olive Oils Produced by Two Different Extraction Techniques 561
A. Ranalli, S. Contento, E. Iannucci and G. Di Flaviano
- Virgin Olive Oil Storage and Stability 567
L. Di Giovacchino, M.R. Mucciarella, N. Costantini, M.L. Ferrante, G. Surricchio and S. Sestili
- Evolution of Chlorophyllian Pigments, Minor Compounds and Sterolic Fraction Extracted from Oil of "Chemlali" Variety during Maturity 571
A. Lazzez, M. Cossentini and M. Khlif
- Phenolic Compounds and Organic Acids Change in Black Oxidized Table Olives 575
C. Campestre, V. Marsilio, B. Lanza, C. Iezzi and G. Bianchi
- Impact of Environmental Conditions on Fatty Acids Combination of Olive Oil in an Iranian Olive, c.v. Zard 579
H. Sadeghi and A.R. Talaii
- RAPD-PCR Amplification of DNA from Virgin Olive Oil 583
E. Perri, I. Muzzalupo and R. Sirianni
- ¹³C NMR Regiospecific Analysis of Olive '*Olea europaea* L.' Oil Triglycerides 587
G. Vlahov, C. Schiavone, N. Simone and M. Agamennone
- Discrimination of Varietal Olive Oils of the Portuguese Cultivars Cobrançosa, Madural and Verdeal Based on their Fatty Acids Composition 591
J.A. Pereira, M.B.P.P. Oliveira, S. Casal and M.R. Alves
- Sensory and Chemical Analyses of Monovarietal Olive Oils from Lake Garda (Northern Italy) 595
D. Tura, O. Failla, D. Bassi and A. Serraiocco
- Chemometrics for the Classification of DOP Olive Oils 599
G. Bianchi, D. Di Vincenzo and L. Giansante
- Characterization of Virgin Olive Oils from Catamarca and La Rioja, Argentina. General Characteristics 603
L.M. Ravetti, A.C. Matías, M. Patumi, P. Rocchi and G. Fontanazza

Intensity and Growth Period of the Fruit Components of Olive Varieties <i>D. Farinelli, M. Boco and A. Tombesi</i>	607
Table Olive Fermentation of <i>Galega</i> Portuguese Variety. Microbiological, Physic-Chemical and Sensorial Aspects <i>L. Catulo, F. Leitão, M.M. Oliveira, C. Peres, S. Silva, M.L. Gomes, M.A. Peito, I. Fernandes and F. Gordo</i>	611
Sensory Analysis of Green Table Olives Fermented in Different Saline Solutions <i>V. Marsilio, C. Campestre, B. Lanza, M. De Angelis and F. Russi</i>	617
Olive Fermentations using Lactic Acid Bacteria Isolated from Olive Phylloplane and Olive Brines <i>P. Lavermicocca, F. Valerio, S.L. Lonigro, F. Baruzzi, M. Morea and M. Gobetti</i>	621
Analysis of Pesticide Residues in Olive Oil using Labelled Internal Standard <i>A. De Nino, A. Procopio, A. Ruffolo, A. Tagarelli, G. Sindona and E. Perri</i>	625
Analytical Methods for Brines and Fruits of <i>Olea europaea</i> cv <i>Galega</i> <i>S. Silva, M.L. Gomes, L. Vilas-Boas, L. Catulo and C. Peres</i>	629
Antimicrobial Activity of <i>Lactobacillus plantarum</i> Strains Isolated from Tradicional Lactic Acid Fermentation of Portuguese Table Olives <i>J. Cordeiro, T.B. da Silva, A. Delgado, S. Pereira, D. Brito and C. Peres</i>	633
Characterization of Italian Virgin Olive Oils from Organic Farming Systems <i>E. Perri, B. Rizzuti, M. Pellegrino, N. Paparella, N. Panaro and C. Cavallo</i>	637
Characterization of Three Monovariety Olive Oils of Beira Baixa (Portugal) <i>M.F. Peres, L.R. Henriques, M.C. Pinheiro-Alves and P. Simões</i>	641
Effect of Olive Crushing Parameters on the Qualitative Characteristics of Virgin Olive Oil <i>A. Koutsafakis, F. Kotsifaki, A. Papamanolioudaki and E. Stefanoudaki</i>	645
Effect of Variable Water Irrigation Supply in Olive (<i>Olea europaea</i> L.) cv. Arbequina in Aragón (Spain). II. Extra Virgin Oil Quality Parameters <i>J.M. Faci, M.J. Berenguer, J.L. Espada and S. Gracia</i>	649
Homology Studies between <i>Lactobacillus plantarum</i> Strains Isolated from Portuguese Table Olives and Producing Regions <i>T.B. da Silva, S. Pereira, M.M. Oliveira, C. Peres and M. Rocheta</i>	653
Influence of Olive Ripening Degree on the Composition and Stability of Olive Oil <i>A. Rotondi and G. Lercker</i>	657
Oil Content of Three Olive Cultivars (<i>Olea europaea</i>) in Beira Baixa (Portugal) <i>M.C. Pinheiro-Alves, P. Simões, L.R. Henriques and M.F. Peres</i>	663
Olive Oil and Quality <i>H. Chimi</i>	667

Oil Quality in Relation to Olive Ripening <i>F. Famiani, P. Proietti, D. Farinelli and A. Tombesi</i>	671
Rationalising of Centrifuge Olive Oil Extraction System <i>M. Khlif, M.N. Arous, H. Rekik, B. Rekik and M.T. Hamdi</i>	675
Selection and Calibration of Eating Olives Technical and Economic Aspects <i>G. Zimbalatti and F. Giametta</i>	679
Study of the Sterolic Fraction of Some Free Crossbreeding Olive Cultivars <i>H. Fourati, M. Cossentini and M. Khlif</i>	683
Classification of Olive Trees According to Fruit and Oil Characterisation <i>H. Fourati, M. Cossentini, B. Karray and M. Khlif</i>	687
Valorization of Olive Cake using Solid State Biotransformation <i>M. Kamal, M. Ismaili-Alaoui, S. Roussos, A. Houde, A. Kademi and D. Radallah</i>	691
Volatile Compounds Analysis in Virgin Oil by Dynamic Headspace Method: Preliminary Results <i>F. Rapparini and A. Rotondi</i>	695
PLANT PROTECTION	
An Appraisal of Diseases and Pathogens of Olive <i>G.P. Martelli, M. Salerno, U. Prota and V. Savino</i>	701
Root Rot of Young Olive Trees Caused by <i>Phytophthora palmivora</i> in Southern Italy <i>G.E. Agosteo, G. Magnano di San Lio and S.O. Cacciola</i>	709
Characterisation of the Causal Agent of Olive Anthracnose in Southern Italy <i>G.E. Agosteo, G. Magnano di San Lio, S.O. Cacciola and S. Frisullo</i>	713
Search for Resistance to Verticillium-Wilt and "Leaf Spot" in Olive <i>F. Ciccarese, A. Ambrico, O. Longo and D. Schiavone</i>	717
Virus Incidence in Four <i>Olea europaea</i> Cultivars Evaluated by Mechanical Inoculation and Immunological Assays <i>M.R.F. Félix, M.I.E. Clara, F.A. Leitao and J.M. Fernandes Serrano</i>	721
Two Necrovirus Isolates with Properties of <i>Olive latent virus 1</i> and of <i>Tobacco necrosis virus</i> from Olive in Portugal <i>M.R.F. Félix and M.I.E. Clara</i>	725
A Possible Synergistic Effect of <i>Erwinia</i> sp. on the Development of Olive Knot Symptoms Caused by <i>Pseudomonas syringae</i> pv. <i>savastanoi</i> in <i>Olea europaea</i> <i>A. Fernandes and M. Marcelo</i>	729
Foliar Treatments with Phosetyl-Al to Control <i>Verticillium dahliae</i> Kleb. in Olive Trees <i>A.S. Fodale, R. Mulè, A. Tucci and A. Cappello</i>	733

Molecular Detection of Olive-Infecting Viruses <i>F. Grieco, R. Alkowni, M. Saponari, V. Pantaleo, V. Savino and G.P. Martelli</i>	737
Effects of Different Treatments against <i>Spilocaea oleagina</i> (Cast.) Hugh. <i>N. Iannotta, D. Monardo and L. Perri</i>	741
Shrivelling of Olive Fruits Associated with Water Stress <i>A. Ippolito and F. Nigro</i>	745
Relationship between Plant Parasitic Nematodes and <i>Verticillium dahliae</i> in Olive <i>F. Lamberti, F. Ciccarese, N. Sasanelli, A. Ambrico, T. D' Addabbo and D. Schiavone</i>	749
Cultural Characteristics, Pathogenicity and Host Range of <i>Colletotrichum gloeosporioides</i> Isolated from Olive Plants in Montenegro <i>J. Latinovic and Z. Vucinic</i>	753
In planta-PCR Detection of Olive-Defoliating and Non Defoliating Pathotypes of <i>Verticillium dahliae</i> <i>J. Mercado-Blanco, D. Rodríguez-Jurado, E. Pérez-Artés and R.M. Jiménez-Díaz</i>	757
Control of Olive Verticillium Wilt by Trunk Injection with Different Doses of Fosetyl-Al and Benomyl <i>R. Mulè, A.S. Fodale and A. Tucci</i>	761
Differential Reactions of Accessions of cv. Tondo Sassarese to Olive Leaf Spot <i>M.P.M. Mungianu, L. Otgianu, G. Tolu, R. Garau, V.A. Prota and U. Prota</i>	765
Investigations on Olive Leaf Spot in Sardinia <i>M.P.M. Mungianu, L. Otgianu, G. Tolu, R. Garau, V.A. Prota and U. Prota</i>	769
Cercosporiosis of Olive in Apulia and Attempts to Control the Disease <i>F. Nigro, A. Ippolito, P. Gallone, G. Romanazzi, P. Carmignano and G. Laccone</i>	773
Occurrence of New Rots of Olive Drupes in Apulia <i>F. Nigro and A. Ippolito</i>	777
Detection and Characterization of Phytoplasmas in Olive Trees from Italy <i>C. Poggi Pollini, A. Ragozzino, F. Faggioli, C. Marzachi, G. Pasquini, R. Bissani, G. Boccardo and M. Barba</i>	781
Detection of Olive-Infecting Viruses in the Mediterranean Basin <i>M. Saponari, R. Alkowni, F. Grieco, N. Driouech, V. Pantaleo, M. Hassan, B. Di Terlizzi, M. Digiario, V. Savino and G.P. Martelli</i>	787
Incidence and Severity of Wilt in Artificially Inoculated cv. Cornicabra Young Olive Trees with Defoliating and Non-Defoliating <i>Verticillium dahliae</i> Pathotypes <i>M.L. Soriano, A. Porras, C. Cañizares, M.M. González and A. Linares</i>	791

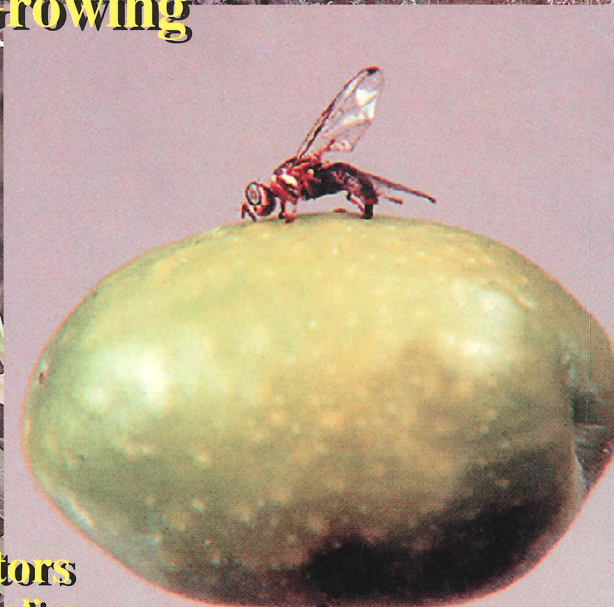

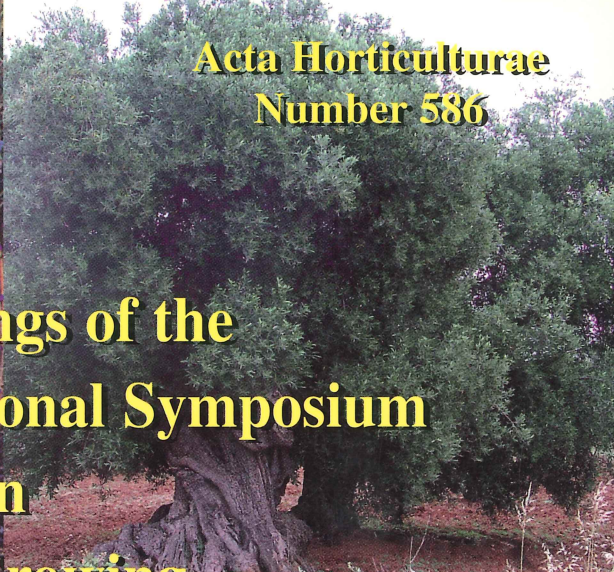

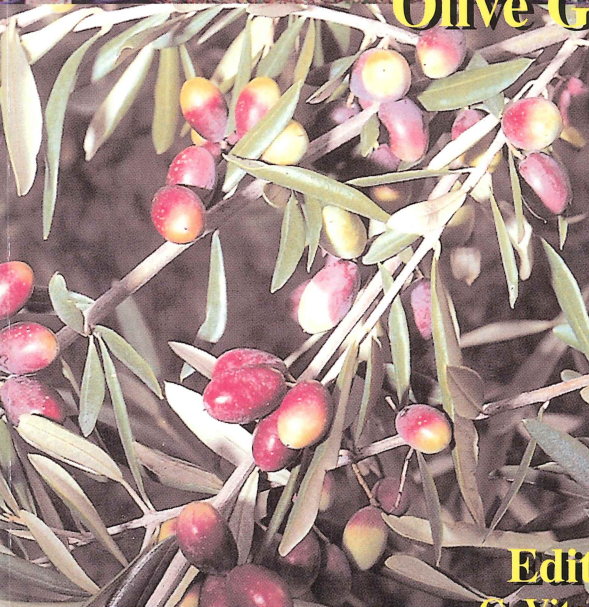

Effect of Temperature, Wetness Duration and Leaf Age on Infection and Development of Olive Leaf Spot <i>J.R. Viruega and A. Trapero</i>	797
Efficacy of Kresoxim-Methyl Against Olive Leaf Spot Caused by <i>Spilocaea oleagina</i> <i>J.R. Viruega, A. Trapero and S. Moreno</i>	801
Establishment of the Economic Thresholds for the Olive Moth, <i>Prays oleae</i> (Bern.) in Trás-Os-Montes region <i>A. Bento and L. Torres</i>	805
Field Evaluations of <i>Fusarium larvarum</i> Formulations in the Biocontrol of <i>Saissetia oleae</i> on Olive in Apulia <i>G. Cozzi, C. Stornelli, A. Moretti, F. Porcelli and A. Logrieco</i>	811
Preliminary Results of Field Control of <i>Zeuzera pyrina</i> L. (<i>Lepidoptera, cossidae</i>) in Apulia <i>A. Guarino, V. Marinuzzi and G. Bari</i>	815
A Survey of Olive Pests in Montenegro <i>S. Hrnčić</i>	819
Mortality Factors Affecting Populations Dynamics of the Scolytid <i>Hylesinus oleiperda</i> Fabr. (<i>Coleoptera, Scolytidae</i>) <i>T. Jardak, M. Moalla and M. Ksantini</i>	823
Temperature Effect on the Biology of <i>Euphyllura olivina</i> Costa. <i>M. Ksantini, T. Jardak and A. Bouain</i>	827
Detection by ELISA of Predators of <i>Prays oleae</i> (<i>Lepidoptera: Plutellidae</i>) in a Portuguese Olive Orchard <i>C. Lozano, T. Morris, M. Campos, J.A. Pereira and A. Bento</i>	831
Spatial Data Analysis in Integrated Pest Management in Olive Growing <i>R. Petacchi, D. Guidotti and I. Rizzi</i>	835
Olive Fruit-Fly Control Methods in Sustainable Agriculture <i>R. Petacchi and A. Minnocci</i>	841
The Effect of Different Rooting Media in In Vitro Screening Trials for Resistance to <i>Meloidogyne incognita</i> <i>N. Sasanelli, T. D'Addabbo, P. Dell'Orco and M. Mencuccini</i>	845
A Field Method for Assessing the Harmfulness to Olive Tree Entomofauna of Pesticides Used for Olive Fly Control <i>A.F. Spanedda and A. Terrosi</i>	849
Toxic Residue Patterns in Olive Fruit, Oil, and Waste Water of the Most Common Insecticides Used for Controlling Olive Fly in Central Italy <i>A.F. Spanedda and A. Terrosi</i>	853

Parasitic Nematodes Associated with Olive in Countries Bordering the Mediterranean Sea <i>N. Vovlas, P. Castillo, H.F. Rapoport and R.M. Jiménez-Díaz</i>	857
PROPAGATION	
Current Horizons in Research on Olive Propagation and Olive-Growing Nurseries <i>P. Fiorino</i>	863
Preliminary Agronomic Evaluation of Two Cultivars of Olive Trees Obtained from Micropropagation Methods <i>C. Briccoli Bati, G. Godino and V. Nuzzo</i>	867
Meski Olive Variety Propagated by Tissue Culture <i>A. Chaari, M. Maalej, A. Chelly Chaabouni and N. Drira</i>	871
Effect of Different Treatments of Hormones on Rooting of <i>Olea europaea</i> cv. Galega vulgar Cuttings <i>J.M. Fernandes Serrano, M.C. Serrano and E. Amaral</i>	875
Micropropagation from Adult Olive Trees <i>L. García-Férriz, R. Ghorbel, M. Ybarra, A. Marí, A. Belaj and I. Trujillo</i>	879
The Effect of Physico-Chemical Characteristics of Substrate on the Cinetic Growth of Young Olive Plants in the Acclimatization Phase: Vegetative Growth <i>W. Khabou</i>	883
The Effect of Orthotropic and Plagiotropic Shoots on Semi-Hard Wood Cuttings Rhizogenesis of some Tunisian Olive Cultivars <i>W. Khabou</i>	887
Field Performance of Micropropagated Olive Plants (cv. Maurino): Morphological and Molecular Features <i>A.R. Leva, R. Muleo, R. Petruccielli and G. Montagni</i>	891
In vitro Micro-Environments to Improve Growth of Olive Plantlets during the Rooting Phase <i>M. Lucchesini and C. Vitagliano</i>	895
Preliminary Results of Somatic Embryogenesis from Young Zygotic Embryos of Olive Tree <i>M. Maalej, A. Chaari-Rkhis, A. Trigui and N. Drira</i>	899
In vitro Germination of Seeds of Three Tunisian Olive Varieties <i>M. Maalej, A. Chaari-Rkhis, A. Trigui and N. Drira</i>	903
Effects of Arbuscular Mycorrhizae Inoculation on Micropropagated Olive Plants <i>M. Marín-Zamora, L. García-Férriz, R. Ghorbel, M. Ybarra and A. Marí</i>	907

Preliminary Studies on the Synthetic Seed and Encapsulation Technologies of Vitro-Derived Olive Explants <i>M. Micheli, P. Dell'Orco, M. Mencuccini and A. Standardi</i>	911
Difficult-to-Root cv. Kalamon Can Easily Be Propagated by Softwood Layers with an Improved Method of Mound-Layering <i>M. Petridou and D.G. Voyiatzis</i>	915
Influence of the Type of Pots and Pruning System in the Development of Cornicabra Young Olive Trees Obtained under Mist Propagation <i>A.A. Prado, M.L. Soriano and A. Porras</i>	919
Effects of Nutrient Media on the Morphogenesis of Cotyledonary Explants of Olive <i>T.S. Pritsa and D.G. Voyiatzis</i>	923
Rooting Capacity of Cuttings as a Criterion for the Evaluation of the Progeny of Five Olive Cultivars <i>C. Voyiatzi, M. Petridou, T. Pritsa, M. Sotiriou and D. Voyiatzis</i>	927
In Vitro Propagation of Fifty Olive Cultivars <i>G. Zuccherelli and S. Zuccherelli</i>	931

LIST OF CONTENTS

Welcome Addresses	7
List of Contents	15
Alphabetical List of Authors	27
List of Participants	31
The Pear in History, Literature, Popular Culture, and Art <i>J. Janick</i>	41
Session 1 – General and Economic Overview	
The World Pear Industry: Current Trends and Prospects <i>A. Segrè</i>	55
Pear Production and Utilization in North America <i>G. Ing</i>	61
Pear Production in South America <i>E.E. Sanchez</i>	67
Pear Production in Northern Europe <i>G. Bünemann, M. Groot and H. Kemp</i>	71
Pear Industry Yield Trends in Southern Europe: Districts and Cultivars <i>V. Mazzotti, G. Miotto, and E. Macchi</i>	75
The Pear Industry in Eastern Europe <i>N. Braniste</i>	83
The Pear Industry in Asia <i>H. Gemma</i>	87
The Pear Industry in Australia, New Zealand and South Africa: Production, Trade and Cultivars <i>A.G. White, K.I. Theron and J. Purbrick</i>	93
The Pear Industry of Himachal Pradesh in India <i>N. Sharma, D.R. Gautam, K.K. Jindal and D.P. Sharma</i>	97
The Nashi Industry in Japan <i>H. Gemma</i>	101
The Economic Costs and Returns of Growing Pears on Oregon, Washington, and California, USA <i>C.F. Seavert</i>	109
An Economic Analysis of the Agricultural Side of Pear Supply-Chain in Southern Europe and China <i>C. Pirazzoli, M. Canavari and H. Hulyiyeti</i>	115

An Evaluation of the Economic Benefits of Adopting Site-Specific Management Technologies in the Tree Fruit Industry <i>C.F. Seavert and F. Niederholzer</i>	123
Italy's Domestic Pear Retail Sales <i>M. Ori and V. Mazzotti</i>	127
Session 2 – Breeding and Biotechnology	
Pear Biotechnology: Recent Progresses and Future Breeding Applications <i>E. Chevreau</i>	133
Can We Develop Self-Fertile Fruit Trees Through Genetic Engineering? <i>I. Van Nerum, J. Keulemans and W. Broothaerts</i>	141
S-Allele Characterization in Self-Incompatible Pear (<i>Pyrus communis</i>): Biochemical, Molecular and Field Analyses <i>S. Zuccherelli, W. Broothaerts, P. Tassinari, S. Tartarini, L. Dondini, A. Bester and S. Sansavini</i>	147
Gene Flow by Pollen to 'Lemon Bergmot' Pear Cultivar Using Isozyme Markers <i>M. Sharifani and J.F. Jackson</i>	153
The Importance of Induced Mutations in Pear Improvement <i>S. Predieri</i>	161
Plant-Defensin Genes Introduction for Improvement of Pear Phytopathogen Resistance <i>V.G. Lebedev, S.V. Dolgov, N. Lavrova, V.G. Lunin and B.S. Naroditski</i>	167
First Doubled Haploid Plants of Pear (<i>Pyrus communis</i>) <i>L. Bouvier, P. Guerif, M. Djulbic and Y. Lespinasse</i>	173
Isoenzymic Polymorphism in Pear <i>A.G. Manganaris and C.G. Tsipouridis</i>	177
Expression Analysis of <i>JPRXYL</i> Gene during Fruit Ripening in Several Pear Cultivars <i>A. Itai, K. Yoshida, K. Tanabe and F. Tamura</i>	183
Discrimination of Pear Cultivars with RAPD, AFLP TM and ISSR <i>L. Monte-Corvo, L. Goulão and C. Oliveira</i>	187
Transgenic Pear Clonal Rootstocks Resistant to Herbicide "Basta" <i>V.G. Lebedev, S.V. Dolgov and K.G. Skryabin</i>	193
Pear Transformation with the Gene for Supersweet Protein Thaumatin II <i>V.G. Lebedev, S.A. Taran, V.V. Shmatchenko and S.V. Dolgov</i>	199
Factors Affecting <i>Agrobacterium</i> -Mediated Transformation of Wild Pear (<i>Pyrus communis</i> , var <i>Pyraster</i>) <i>E. Caboni, P. Lauri and B. Watillon</i>	203

Cloning and Characterization of Resistance Gene Analogs (RGA) in European Pear (<i>Pyrus communis</i>) <i>L. Dondini, S. Tartarini, E. Nocelli and S. Sansavini</i>	207
Reactivity of European Pear (<i>Pyrus communis</i>) Progenies to Fire Blight (<i>Erwinia amylovora</i>) <i>L. Dondini, S. Tartarini, S. Sansavini, S. Malaguti and C. Bazzi</i>	211
Session 3 – Cultivar and Germplasm Evaluation	
Breeding for New Traits in Pear <i>E. Bellini and S. Nin</i>	217
New Naumburg/Pillnitz Pear Breeding Results <i>M. Fischer and G. Mildenerger</i>	225
Thirty Years of Pear Breeding Activity at ISF Forli, Italy <i>L. Rivalta, M. Dradi and C. Rosati</i>	233
The New Zealand Pear Breeding Project <i>A.G. White and L.R. Brewer</i>	239
Selection of Superior Clones of European Pears in Himachal Pradesh, India <i>D.R. Gautam and N. Sharma</i>	243
Achievements of Pear Breeding in Korea <i>I.S. Shin, W.C. Kim, H.S. Hwang and Y.U. Shin</i>	247
Pear Breeding and Cultivar Evaluation in Poland <i>D.E. Kruczyńska and A. Czynczyk</i>	251
Hybridisation of European and Nashi Pears: Selecting for Novel Taste Traits <i>S. Sansavini, S. Musacchi, G.L. Ferrazzano and V. Ancarani</i>	255
Achievements and Prospectives in Pear Breeding at the Fruit Research Station Voinesti, Romania <i>N. Andreies</i>	261
‘Angelys’, a New Winter Pear to Replace ‘Passe Crassane’ <i>M. Le Lézec, A. Belouin, P. Guérif and Y. Lespinasse</i>	265
‘Sabina’: a New Summer Pear Cultivar <i>E. Bellini</i>	271
‘Turandot’, ‘Norma’ and ‘Carmen’: Three New Early Pear Cultivars for High-Quality Production <i>L. Rivalta and M. Dradi</i>	275
Fireblight Evaluation of Advanced Italian Selections and Cultivars of Pear <i>C. Rosati, L. Rivalta, M. Dradi, M. Le Lezec, A. Belouin, R. Chartier and P. Lecomte</i>	279

Evaluation of European Pear (<i>Pyrus communis</i>) for Japan's Fresh Market <i>H. Bessho, K. Sadao and J. Soejima</i>	283
Introduction of Some Asian Pear Cultivars (<i>Pyrus pyrifolia</i>) to Iran <i>K. Arzani</i>	287
Wild Pear Species in Hungary <i>D. Surányi</i>	291
Session 4 – Rootstock Breeding and Evaluation	
Rootstocks for European Pear: a Review <i>S.J. Wertheim</i>	299
Performance of 'Conference' Cultivar on Several Quince and Pear Rootstocks: Preliminary Results <i>F. Loreti, R. Massai, C. Fei and F. Cinelli</i>	311
Final Evaluation of the NC140 National Pear Rootstock Trial <i>A.N. Azarenko, E. Mielke, D. Sugar, F. Eady, B. Lay, G. Tehrani, A. Gaus and C. Rom</i>	319
Evaluation of the Horner Rootstocks <i>E.A. Mielke and L. Smith</i>	325
Wild Pear Seedling Rootstocks for Pear Scions <i>D. Surányi and Z. Erdos</i>	331
New Pear Rootstocks from Geisenheim, Germany <i>H.B. Jacob</i>	337
Achievements in Breeding of Romanian Clonal Pear Rootstocks <i>C. Mazilu</i>	345
'Pyriam': a New Pear Rootstock <i>M.H. Simard and J.C. Michelesi</i>	351
Selection Programme of <i>Pyrus communis</i> Rootstocks at CIV Consorzio Italiano Vivaisti <i>M. Leis and A. Martinelli</i>	357
The Behaviour of Quince Selections as Pear Rootstocks for 'Abbé Fétel' and 'Conference' Pear Cultivars in The Rio Negro Valley, Argentina <i>H.R. Castro and R.O. Rodríguez</i>	363
Ten Years of Pear Production and Precocity Data from a Commercial Pear Orchard Comparing Eight Old Home by Farmingdale Clonal Rootstocks <i>G. Ing</i>	369
The Behaviour of 'Old Home' x 'Farmingdale' Selections as Interstocks in Pear/Quince Combinations, in Rio Negro Valley, Argentina <i>R.O. Rodríguez and H.R. Castro</i>	373

'Rocha' Performance on EMLA–C Rootstock — Twenty Years of Observations <i>A. Santos, A. Silva, J. Alexandre, M. Carvalho and R. Castro</i>	379
Comparative Field Performance of cvs. Sensation Red Bartlett and Cascade Grafted to Six Quince and Pear Clonal Seedling Rootstocks <i>S. Musacchi, V. Ancarani, M. Grandi and S. Sansavini</i>	385
Variation of Some Enzymatic Activities in Relationship to Scion/Stock Compatibility in Pear/Quince Combinations <i>S. Musacchi, A. Masia and J. Fachinello</i>	389
Study of Gene Expression in Compatible and Incompatible Pear/Pear and Pear/Quince Grafts by mRNA Differential Display <i>L. Pirovano, G.A. Sacchi, S. Musacchi, A. Abruzzesi, G. Berardi, M. Cocucci and S. Sansavini</i>	393
Effect of Budding Height on Tree Size and Precocity <i>E.A. Mielke and L. Smith</i>	397
Evaluation of Pear Interstems <i>E.A. Mielke and J. Turner</i>	401
Behaviour of Four Over Grafted Chinese Pear Varieties (<i>Pyrus serotina</i>) in Bucuresti Area <i>F. Stanica</i>	405
 Session 5 - In Vitro Culture and Propagation	
In Vitro Tissue Culture of Pear: Advances in Techniques for Micropropagation and Germplasm Preservation <i>R.L. Bell and B.M. Reed</i>	412
The Propagation of <i>Pyrus syriaca</i> by Seeds and Stem Cuttings <i>F.M. Al-Bukhari, M.M. Qrunfleh and D.M. Al-Eisawi</i>	419
Micropropagation of Pear through Temporary Immersion <i>C. Damiano, A. Frattarelli and M. Giorgioni</i>	425
Vascular Tissue Regeneration in "in Vitro" Grafts of Pear/Quince <i>L. Espen, M. Cocucci and G.A. Sacchi</i>	431
Comparison of Decontaminating Treatments on <i>Agrobacterium</i> -inoculated Internode Explants of 'Bartlett' Pear <i>P. Negri and L. Manzecchi</i>	437
Effects of Hormonal Conditioning of Pear Leaf Explants on <i>Agrobacterium</i> -mediated Transformation Efficiency <i>P. Negri, L. Cantoni and L. Manzecchi</i>	441
In Vitro Rooting and Shoot Growth of <i>Pyrus betulaefolia</i> Rootstock <i>M. Pasqual, J. M. Cavalcante-Alves, N. N. J. Chalfun, A. B. Silva, L.F. Dutra and J.V. Bianchi</i>	447

Rooting of Hardwood Cuttings of <i>Pyrus calleryana</i> in Response to Shading, Opaque Wrapping, and IBA <i>N.N.J. Chalfun, J.M.R. Reis, M. Pasqual, J.M. Cavalcante-Alves, L.F. Dutra and J.V. Bianchi</i>	451
Influence of Temperature and Sucrose on In Vitro Proliferation of <i>Pyrus calleryana</i> <i>M. Pasqual, J.M. Cavalcante-Alves, N.N.J. Chalfun, L.F. Dutra and J.V. Bianchi</i>	453
Improved Culture Media for the in Vitro Establishment of Pear from Nodal Cuttings <i>I.C.G. Freire, C.P.S. Coelho and M.T.F. Barros</i>	457
In Vitro Rooting of Pyrodwarf and Cydomalus, Two Rootstocks for Pear, under Photoautotrophic Conditions <i>G. De Paoli, E. Subirà and A. Battistini</i>	463
Influence of Various Factors on Adventitious Shoot Formation from Pear Leaf Explants <i>V.G. Lebedev and S.V. Dolgov</i>	469
Standard and Compact Pear Clones in Vitro Sensitivity to Cytokinins <i>E. Gatti and S. Predieri</i>	473
In Vitro Production of Virus-Free Pear Plants <i>S. Zilka, E. Faingersh, A. Rotbaum, Y. Tam, S. Spiegel and N. Malca</i>	477
Elimination of Apple Chlorotic Leaf Spot Virus (ACLSV) from Pear by in Vitro Thermotherapy and Chemotherapy <i>M. Cieślińska</i>	481
Development of Protocols for in Vitro Rooting of Advanced Selections of <i>Pyrus communis</i> Rootstocks <i>A. Previati, F. Da Re, D. Bassi, M. Tagliavini and B. Marangoni</i>	485
 Session 6 – Pest and Diseases	
Environment Friendly Pest-Control Strategies in Pear: State of the Art and Prospects <i>E. Pasqualini</i>	489
Fungal and Bacterial Pests in Pear Growing <i>T. Deckers</i>	497
Five Years of Mating Disruption in Combination with Narrow-Range Petroleum Spray Oil to Control Pear Pest in Southern Oregon <i>P. VanBuskirk, R. Hilton, and P. Westgard</i>	501
Host-Specific SV-Toxin of the Fungal Pathogen Causing Brown Spot of European Pear <i>P. Singh, H. Nakajima, H. Otani, M. Kodama, K. Kohmoto, P. Park, R. Bugiani and P. Cavanni</i>	507

Induction of Pathogen Resistance in Pear by Transiently Altering the Flavonoid Metabolism with Specific Enzyme Inhibitors	513
<i>K. Stich, H. Halbwirth, W. Kampen, D. Treutter, S. Römmelt, S. Peterek, G. Forkmann, T.C. Fisher, S. Martens, B. Meisel, G. Costa, C. Andreotti, E. Sabatini, C. Bazzi and W. Rademacher</i>	
The Use of Climatic Data for Integrated Management of Pears: Forecasting Fire Blight	523
<i>S.M. Abol-Maatey, M.A. Medany, A.F. Abou-Hadid, N.Y. Abd El-Ghafar and I. S. Elewa</i>	
Elimination of Viruses from the USDA <i>Pyrus</i> Germplasm Collection	529
<i>J.D. Postman and D. Sugar</i>	
The Effect of Prohexadione-Ca on Vegetative and Cropping Performance and Fire Blight Control of Pear Trees	531
<i>G. Costa, C. Andreotti, E. Sabatini, A. M. Bregoli, F. Bucchi, G. Spada and F. Mazzini</i>	
Epidemiological Studies of Fire Blight (<i>Erwinia Amylovora</i>) in Spain	535
<i>I. Llorente, E. Badosa, P. Vilardell and E. Montesinos</i>	
Field Evaluation of a Brown Spot Disease Predictor as a System for Scheduling Fungicide Sprays for Control of <i>Stemphylium Vesicarium</i> on Pear	539
<i>I. Llorente, C. Moragrega, P. Vilardell, E. Montesinos, R. Bugiani, P. Govoni and I. Gherardi</i>	
Microscopic Studies of Scab Resistance Symptoms (<i>Venturia Pirina</i>) on Leaves of Pear Cultivars (<i>Pyrus Communis</i>)	543
<i>M. Chevalier, P. Guerif, M. Tellier, F. Cheve, M. Le Lezec, Y. Lespinasse and R. Filmon</i>	
Acquired Resistance of <i>Stemphylium Vesicarium</i> to Procymidone on Pear in Italy	547
<i>M. Collina, I. Gherardi, and A. Brunelli</i>	
Patulin and Other Metabolites Produced by Fungi in Pears	551
<i>I.A. Laidou, C.C. Thanassoulopoulos and M. Liakopoulou-Kyriakides</i>	
Detection of Pear Decline Phytoplasma with Special Reference to the Production of Healthy Plant Material	555
<i>C. Poggi Pollini, R. Bissani, A.R. Babini, M. Cardoni and V. Vicchi</i>	
New Environmentally Friendly Products Against Psylla (<i>Psylla Pyricola</i>)	559
<i>C.G. Tsipouridis, A.G. Manganaris and I. Kajati</i>	
Factors Influencing the Changes in Population State of Pear Suckers (<i>Cacopsylla</i> Sp.) in Poland	563
<i>K. Jaworska, R.W. Olszak and R.Z. Zajac</i>	
Insecticide Resistance in the Pear Psylla	567
<i>R. Buès and L. Boudinhon</i>	

Variation in the Susceptibility of Pear Seedlings to Damage by the Larvae of the Sawfly (<i>Caliroa cerasi</i>) <i>L.R. Brewer, P.A. Alspach and A.G. White</i>	571
The Density of Pear Rust Mite <i>Epirimerus piri</i> (Nalepa) on Some Pear Cultivars in Central Poland <i>T. Badowska-Czubik, D. Kruczynska and E. Pala</i>	575
Concentrated Spray Applications in Pear Trellising <i>J.C. Magdalena, E. Sanchez and S. Bemher</i>	579
Organic Pear Production in the Rio Negro Valley of Argentina <i>L.I. Cichón, M.D. Raffo and E. Sánchez</i>	583
 Session 7 – Orchard Design, Training and Pruning Systems	
European Pear Orchard Design and HDP Management: a Review <i>S. Sansavini and S. Musacchi</i>	589
Effect of Training System and Rootstock on Growth and Productivity of ‘Golden Russet® Bosc’ Pear Trees <i>R.B. Elkins and T.M. DeJong</i>	603
Effect of Spacing and Rootstock on the Performance of ‘Comice’ Pear in New Zealand <i>J.W. Palmer</i>	609
Influence of the Plant and Pruning System on the Financial Result of ‘Conference’ <i>J. Vercammen</i>	615
European Pear Architecture and Fruiting-Branch Management: Overview of an INRA Research Program <i>P.E. Lauri, E. Costes and A. Belouin</i>	621
Pear Fruiting-Branch Models Related to Yield Control and Pruning <i>S. Sansavini</i>	627
The Bi-Coloured Pears ‘Rosemarie’ and ‘Flamingo’: Characteristics, Production Problems and Possible Solutions <i>J.P. Human</i>	635
Effects of Trunk Girdling on Tree Growth, Fruit Production, and Fire Blight <i>C. Ingels</i>	641
‘D’Anjou’ and ‘Bosc’ Fruit Quality as Affected by Rootstock and Training System <i>E.A. Mielke</i>	643
Behaviour of Three Pear Cultivars Propagated In Vitro and Self-Rooted, on Tatura Trellis Canopy <i>F. Stanica, M. Dumitrascu and A. Peticila</i>	647

Session 8 – Nutrition and Soil Management

- Nitrogen Nutrition in Pear Orchards 653
E.E. Sánchez
- Water Stress Limits for Vegetative and Reproductive Growth of ‘Barlett’ Pears 659
J. Marsal, M. Mata, A. Arbonès, J. Rufat and J. Girona
- Determination of Leaf Standards for Mineral Diagnosis in Pear Orchards in the Po Valley, Italy 665
M. Toselli, F. Mazzanti, B. Marangoni M. Tagliavini and D. Scudellari
- Use of Urea-Sulfuric Acid and Iron Chelate to Mitigate Iron Chlorosis in Pear 671
R.B. Elkins, R.D. Meyer and C.D. Adams
- Different Responses Induced by Bicarbonate and Iron Deficiency on Microshoots of Quince and Pear 677
R. Muleo, M. Fisichella, C. Iacona, R. Viti and F. Cinelli
- Effects of Rootstock on the Physiological Response of Pear cultivar Abbé Fétel Trees to Increasing Levels of Salinity of the Irrigation Water 683
S. Musacchi, M. Quartieri, M. Ciambellini, A. Masia, L. Corelli Grappadelli and M. Tagliavini
- Effects of Regulated Deficit Irrigation on the Performance of Pear in an Italian Sub-Humid Area 687
S. Anconelli and P. Mannini
- Influence of Relief and Erosion Control Systems on Evapotranspiration in Pear Trees 691
M. Iancu

Session 9 – Fruit Set and Crop Physiology

- Factors Influencing the Flowering, Fruit Set and Fruit Growth of European Pears 699
A.D. Webster
- Pear Tree Shoot Growth Patterns in Relation to Chemical Control of Vegetative Growth with Prohexadione-Calcium (Apogee®) 711
D.C. Elfving, D. Sugar and D. Faubion
- Ethephon, NAA, and NAD as Chemical Thinners of Pear Fruitlets 717
C. Bonghi, M. Poja, P. Tonutti and A. Ramina
- Reducing Secondary Flowering in ‘Bartlett’ Pear to Reduce Fire Blight 723
S.M. Southwick, K. Glozer, J.T. Yeager and R. Moran
- The Effect of Blossom Desiccants on Crop Load of ‘Packham’s Triumph’ Pear 729
S.A Bound and L. Mitchell

Improvement of Fruit Set on Young Pear Trees Cultivar Conference with Gibberellins <i>T. Deckers and H. Schoofs</i>	735
Leaf Anatomy and Photosynthesis of Pear Trees with Different Growth Habit <i>A. Rotondi and S. Predieri</i>	745
Influence of Leaf Area on the Sugar and Organic Acids Content in Pear (<i>Pyrus communis</i>) Fruits cultivar Williams <i>M. Hudina and F. Štampar</i>	749
Controlling Vigour and Colour Development in the Bi-Coloured Pear Cultivar Rosemarie <i>K.I. Theron, M. Le Grange, M. Smit, S. Reynolds and G. Jacob</i>	753
Effects of Prohexadione-Calcium (Apogee™) on Blossoming, Production, and Fruit Quality in Pear <i>D. Sugar, D.C. Elfving, and E.A. Mielke</i>	757
Nectar Composition in Some Pear Cultivars <i>Á. Farkas, L. Gy. Szabó and Zs. Orosz-Kovács</i>	761
Effects of Retain™ on Fruit Maturity and Fruit Set of Pear Cultivars Williams and Packham's Triumph <i>M. C. Dussi, D. Sosa and G. Calvo</i>	767
Insect Attraction of Flowers in Pear Cultivars <i>Á. Farkas, Zs. Orosz-Kovács and L. Gy. Szabó</i>	773
Effect of Cropload in Previous Year on Fruit Size of Pear Cultivar Clara Frijs <i>M. Bertelsen</i>	777
Growth of 'Clara Frijs' Pear in a Nordic Climate <i>M. Bertelsen</i>	783
Chemical Thinning in Nashi <i>S.A. Bound and L. Mitchell</i>	789
A New Post-Bloom Thinning Agent for 'Packham's Triumph' Pear <i>S.A Bound and L. Mitchell</i>	793
Effect of the Synthetic Cytokinin CPPU on Fruit Size and Yield of 'Spadona' Pear <i>R.A. Stern, M.A. Flaishman and A. Shargal</i>	797
 Session 10 – Fruit Quality	
The Quality of Pear Fruit <i>P. Eccher Zerbini</i>	805

Volatile Constituents of 'Harrow Sweet' Pears by Dynamic Headspace Technique <i>F. Rapparini and S. Predieri</i>	811
Studies on Sensory Evaluation and Quality of Pear Fruits in Emilia-Romagna <i>S. Predieri, D. Missere and E. Gatti</i>	817
Non-Destructive Determination of Internal Quality in Intact Pears By Near Infrared Spectroscopy <i>G. Costa, M. Noferini and C. Andreotti</i>	821
Changes in 'Conference' Pear Peel Pigments during Storage and Ripening <i>J. M. Ben and J. Baszczyk</i>	827
 Session 11 – Postharvest Physiology and Storage	
Postharvest Physiology and Pathology of Pears <i>D. Sugar</i>	831
Harvest Maturity, Mineral Content and Postharvest Quality of 'Conference' Pears Stored in High or Low CO ₂ <i>P. Eccher Zerbini, M. Grassi, A. Rizzolo, A. Pianezzola, G. De Colellis and A. Brambilla</i>	837
Study on Watercore Occurrence in 'Hosui' Japanese Pear <i>H. Gemma, S. Oomori, S. Sugaya, S-A. Peng and S. Iwahori</i>	843
Influence of Calcium and Oxygen Levels on Soft Scald of Stored 'Abbé Fétel' Pears <i>P. Bertolini, M. Guizzardi and C. Casadei</i>	849
Does Boron Affect the Occurrence of Physiological Disorders of 'Conference' Pears during Ca-Storage? <i>H. Xuan, J. Streif and F. Bangerth</i>	855
Chlorophyll Fluorescence as a Predictive Method for Detection of Browning Disorders in 'Conference' Pears during Controlled Atmosphere Storage <i>A.A. Saquet and J. Streif</i>	861
Composition of Hexane Extracts from 'Conference' Pear Peel <i>R. Lo Scalzo, P. Eccher Zerbini and M. Grassi</i>	865
Changes in Starch Content in 'La France' Pears during Storage <i>H. Murayama, S. Ikai and T. Fukushima</i>	869
Influence of Harvest Date and Storage on H ₂ O ₂ and Scavenger Systems in 'Passe Crassane' Pears <i>A.M. Spinardi, C. Visai, N. Negrini and M. Cocucci</i>	873
Control of Superficial Scald in 'Beurré D'Anjou' Pears with Low Oxygen Levels <i>G. Calvo, M.E. Salvador and E. Sanchez</i>	877

Combination of <i>Pseudomonas Fluorescens</i> EPS288 and Reduced Fungicide Dose for Control of <i>Penicillium</i> Rot during Postharvest Storage of Pear <i>J. Francés, P. Vilardell, A. Bonaterra, E. Badosa and E. Montesinos</i>	881
Fungi that Cause PostHarvest Diseases in Pears <i>I.A. Laidou and C.C. Thanassouloupoulos</i>	885
Effect of Short-Term Exposure to High CO ₂ in Combination with Biological Control on Postharvest Decay of Pears, and Factors Affecting Sensitivity of Pears to CO ₂ Injury <i>D. Sugar and J. M. Benbow</i>	889
Storage of 'Conference' Pear in Low Ethylene Atmosphere <i>A. Testoni, F. Lovati, M. Grassi and R. Lo Scalzo</i>	893
Effect of Post Storage Ripening Conditions on Quality of 'Bartlett' ('Williams Bon Crétien') Pears <i>G.C. Pratella, F. Neri, S. Brigati and M. Maccaferri</i>	897
 Epilogue	
Final Resolution Proposal	903
Proclamation of the ISHS Pear Working Group	905
Fruit Exhibition	907
List of Pears	909

LIST OF CONTENTS

Foreword	5
List of Contents	9
List of Authors	17
List of Participants	21
Persistence and Mobility of Malathion and Parathion in Horticultural Semi-arid Soils <i>L. Andrade, P. Marcet, E.F. Covelo and M.L. Reyzábal</i>	29
Use of Numerical Weather Forecast and Time Series Models for Predicting Reference Evapotranspiration <i>B. Arca, P. Duce, R.L. Snyder, D. Spano and M. Fiori</i>	39
Water Table Level Effect on the Water Balance and Yield of Two Pear Rootstock <i>A. Battilani, S. Anconelli and G. Guidoboni</i>	47
Regulated Deficit of Irrigation (RDI) Effects on Growth and Yield of Plum Tree <i>A. Battilani</i>	55
Water and Nitrogen Use Efficiency of Potato Grown in a Sub-Humid Area <i>A. Battilani, L. Dalla Costa and L. Lovatti</i>	63
Modelling Actual Evapotranspiration of <i>Ligustrum japonicum</i> from Rooted Cuttings to Commercially Marketable Plants in 12 Liter Black Polyethylene Containers <i>R.C. Beeson, Jr.</i>	71
Irrigation Management to Optimize Olive Growth, Production and Sensorial Oil Quality <i>M.J. Berenguer, S.R. Grattan, J.H. Connell, V.S. Polito and P.M. Vossen</i>	79
FAO Activities to Develop Agro-climatic Datasets and Tools for the Needs of Irrigation Management <i>M. Bernardi</i>	87
The Effect of Water Stress Applied Alternately to Part of the Wetting Zone along the Season (PRD-Partial Rootzone Drying) on Wine Quality, Yield and Water Relations of Red Wine Grapes <i>B. Bravdo, A. Naor, T. Zahavi and Y. Gal</i>	101
Late-season Water Management Effects on Quality and Yield of Processing Tomatoes <i>M.D. Cahn, E.V. Herrero, B.R. Hanson, T.K. Hartz and E.M. Miyao</i>	111
Saving Water with <i>Sphagnum</i> Peat in Nursery Growing Media <i>J. Caron, R. Beeson, J. Haydu and J. Boudreau</i>	119
Progress in the Development of Partial Rootzone Drying of Apple Trees <i>H.W. Caspari, T.C. Einhorn, B.G. Leib, C.A. Redulla, P.K. Andrews, L. Lombardini, T. Auvil and J.R. McFerson</i>	125

Partial Rootzone Drying of <i>Vitis vinifera</i> cv. 'Shiraz' Winegrapes in a Semi-Arid Climate <i>Y.M. Chalmers, G. Kelly and M.P. Krstic</i>	133
Production of Quality Aroid Foliage Plants Using Captured Rainwater and Irrigation Runoff as an Irrigation Source <i>Jianjun Chen and R.C. Beeson, Jr.</i>	139
Scaling up Photosynthetic Water Use Efficiency from Leaf to Whole Plant in Table Grapevine Trained to Tendone System <i>L. de Palma, V. Novello and G.B. Mattii</i>	147
Leaf Water Use Efficiency in a 'Tendone' Trained Canopy: a Contribute to the Ecophysiological Characterization of a Grapevine Growing System <i>L. de Palma and V. Novello</i>	155
Advanced Weighing Equipment for Water, Crop Growth and Climate Control Management <i>R. de Graaf, A. de Gelder and C. Blok</i>	163
Postharvest Regulated Deficit Irrigation of Peach Tree in a Mediterranean Environment: Effects on Vegetative Growth and Yield <i>B. Dichio, C. Xiloyannis, V. Nuzzo, G. Montanaro and A.M. Palese</i>	169
Transpiration of an Apple Orchard in a Cool Humid Climate: Measurement and Modeling <i>D. Dragoni, A.N Lakso and R.M. Piccioni</i>	175
Estimating Missing Reference Evapotranspiration Data by Correlation Analysis <i>S.O. Eching</i>	181
Statistical Control Charts for Quality Control of Weather Data for Reference Evapotranspiration Estimation <i>S.O. Eching and R.L. Snyder</i>	189
Partial Rootzone Drying and Deficit Irrigation of 'Gala' Apples in a Semi-arid Climate <i>T. Einhorn and H.W. Caspari</i>	197
High Yields of Mechanically Harvested Snap Beans as Induced by Moderate Water Stress during Flowering <i>P. Deproost, F. Elsen and M. Geypens</i>	205
Slope and Aspect Effect on Evaporation as Measured by Atmometer <i>B.A. Faber</i>	213
Canopy and Leaf Light Reflectance Features in Relation to Water Content in Apple <i>O. Facini, S. Loreti, F. Rossi and C. Bignami</i>	217
Combining Techniques to Study Evapotranspiration in Woody Crops: Application to Small Areas - Two Case Studies <i>M.I. Ferreira, T.A. Paço and J. Silvestre</i>	225

Effect of Water Stress Induced at Different Growth Stages on Grapevine cv. Chardonnay on Production and Wine Quality <i>R. Ferreyra, E., G. Sellés V., R. Ruiz S. and I. Sellés M.</i>	233
A Daily Water Balance Estimate for Climate Risk Evaluation at a Local Scale <i>M. Fiori, A. Motroni, P. Duce and D. Spano</i>	237
Soil Wetting Pattern Monitoring is a Key Factor in Precision Irrigation of Grapevines <i>S. Fuentes, G. Rogers, J. Conroy, S. Ortega-Farias and C. Acevedo</i>	245
Response of Stem Diameter to Water Stress in Greenhouse-Grown Vegetable Crops <i>M. Gallardo, R.B. Thompson, L.C. Valdez and C. Pérez</i>	253
Influence of Water Salinity on Growth and Water Relations of Loquat Plants Grafted on Two Rootstocks <i>F. García-Legaz, E. López Gomez, J. Mataix-Beneyto, M.J. Sánchez-Blanco, T. Ferrández and A. Torrecillas</i>	261
Investigating Crop Coefficients in Drip Irrigated Orange Trees <i>C. Germanà and V. Sardo</i>	269
Pear Crop Coefficients Obtained in a Large Weighing Lysimeter <i>J. Girona, J. Marsal, M. Mata and J. del Campo</i>	277
The Relationship between Peach Tree Transpiration and Effective Canopy Cover <i>I. Goodwin, D.M. Whitfield and D.J. Connor</i>	283
The Effect of Irrigation on Fruit Development of Olive Cultivars 'Frantoio' and 'Leccino' <i>R. Gucci, S. Gentile, M. Serravalle, F. Tomei and H.F. Rapoport</i>	291
Oil Quality of Olive cv. 'Leccino' Grown under Irrigated or Dry-farmed Conditions <i>R. Gucci, M. Servili, S. Esposto and R. Selvaggini</i>	297
Crop Evapotranspiration of Processing Tomato under Furrow and Subsurface Drip Irrigation <i>B.R. Hanson and D.M. May</i>	303
Economics of Five Irrigation Technologies for Container-grown <i>Viburnum odoratissimum</i> <i>J.J. Haydu, R.C. Beeson and J. Caron</i>	309
Feasibility of Using LVDT and Watermark Sensor for Irrigation Scheduling in Plum <i>D.S. Intrigliolo and J.R. Castel</i>	317
Tensiometric Measurements: a Tool to Analyse Root Growth and to Schedule Irrigation of Landscape Trees <i>C. Isbérie, A. Bensaoud, É. Lesage and C. Lohou</i>	325

Using Information from Sap Flow Measurements to Improve Soil Adaptability to Drip Irrigation in Orchards <i>C. Isbérie, B. Cabibel, C. Valancogne and T. Afonso Paço</i>	333
Improving a Model for Predicting Peach Tree Evapotranspiration <i>R. Scott Johnson, J. Ayars and T. Hsiao</i>	341
Water Requirement and Water Use Efficiency of Fresh and Waiting-Bed Strawberry Plants <i>D.S. Kirschbaum, M. Correa, A.M. Bórquez, K.D. Larson and T.M. DeJong</i>	347
Water Use and Stomatal Behavior of Sweetgum (<i>Liquidambar styraciflua</i> L.) Relative to Reference Evapotranspiration in Three Contrasting Regions <i>R. Kjelgren, T. Montague and R. Beeson</i>	353
Scheduling Automatic Irrigation by Threshold-set Soil Matric Potential Increases Irrigation Efficiency While Minimizing Plant Stress <i>I. Klein</i>	361
Soil Water Dynamics in the Root Zone of a Micro-Sprinkler Irrigated Almond Tree <i>K.S Koumanov, J.W. Hopmans and L.J. Schwankl</i>	369
The Use of Microlysimeters for the Measurement of ETM (Maximum Evapotranspiration) on Camone Tomato (<i>Lycopersicon esculentum</i> Mill.) Hybrid in Greenhouse <i>M.G. Mameli, A. Sirigu, A. Soddu, F. Chessa and S. Meloni</i>	377
The Growth Response of California Native Grasses to Saline Sprinkler Irrigation <i>K.A. Marcotte, L. Wu, D.E. Rains and J.H. Richards</i>	383
Recommendations for Water Conservation in Peach Orchards in Mediterranean Climate Zones using Combined Regulated Deficit Irrigation <i>J. Marsal, G. Lopez, M. Mata, A. Arbones and J. Girona</i>	391
Response of Processing and Fresh-market Onions to Drip Irrigation <i>B.R. Hanson and D.M. May</i>	399
Establishing Reference Values of Trunk Diameter Fluctuations and Stem Water Potential for Irrigation Scheduling of Olive Trees <i>A. Moriana and E. Fereres</i>	407
Effectiveness of Over Tree Irrigation to Control Temperature Stress in SRA 63 Clementines <i>M. Mulas, A. Fadda, R. Zurru and G. Chessa</i>	413
Comparative Evaluation of Pima and Upland Cotton Transpiration in the San Joaquin Valley <i>D.S. Munk, J. Wroble, R.L. Snyder, J. Robb and R. Hutmacher</i>	419
Sources of Uncertainty in Irrigation Scheduling, and Practical Ways to Resolve some of Them <i>A. Naor</i>	427

Water and Land Productivity under Conventional versus Vertical Cultivation <i>M.N. Nimah, I. Bashour, K. Corbani and S. Gianni</i>	437
Monitoring Soil Moisture with Inexpensive Dielectric Sensors (Echoprobe) in a Citrus Orchard under Low Volume Irrigation <i>N.V. O'Connell and R.L. Snyder</i>	445
Pear Water Relations under Partial Rootzone Drying <i>M.G. O'Connell and I. Goodwin</i>	453
Consumptive Use Program (CUP) Model <i>M.N. Orang, J. Scott Matyac and R.L. Snyder</i>	461
Estimation of Reference Evapotranspiration in the Maule Region of Chile: A Comparison between the FAO Penman-Monteith and Bowen Ratio Methods <i>S.O. Ortega-Farías, V. Rojas, H. Valdés and P. González</i>	469
Estimation of Evapotranspiration over a Greenhouse Tomato Crop using the Penman-Monteith Equation <i>H. Valdés, S. Ortega-Farías, M. Argote, B. Leyton, A. Oliosio and H. Paillán</i>	477
Effects of Different Levels of Water Application in Pre- and Post-veraison on Must Composition and Wine Color (cv. Cabernet Sauvignon) <i>C. Acevedo, S. Ortega-Farías, Y. Moreno and F. Córdova</i>	483
Effect of Four Levels of Water Application on Grape Composition and Midday Stem Water Potential of <i>Vitis vinifera</i> L. cv. Cabernet Sauvignon <i>S. Ortega-Farías, M. Duarte, C. Acevedo, Y. Moreno and F. Córdova</i>	491
Talca Irrigation Management System (TIMAS) for Grapevine <i>S. Ortega-Farías, C. Acevedo, A. Acevedo and B. Leyton</i>	499
Measurements and Estimates of Peach Orchard Evapotranspiration in Mediterranean Conditions <i>T.A. Paço, N. Conceição and M.I. Ferreira</i>	505
Irrigation Water Requirements for Some Horticultural Crops Specific to the Dobrogea Region, Romania <i>Cr. Paltineanu and I.F. Mihailescu</i>	513
Irrigas - a New Simple Soil Moisture Sensor for Irrigation Scheduling <i>P.J. Paschold and A. Mohammed</i>	521
The Water Need of Asparagus (<i>Asparagus officinalis</i> L.) Determined in a Lysimeter Station <i>P.-J. Paschold, B. Artelt and G. Hermann</i>	529
Evapotranspiration: Measuring and Modeling <i>Kyaw Tha Paw U, S. Wharton and J. Kochendorfer</i>	537
Vegetative Growth and Salt Accumulation of Six Olive Cultivars under Salt Stress <i>S. Perica, M. Brkljača, S. Goreta, D. Romić and M. Romić</i>	555

Effects of Recycled Water on Soil Salinity Levels for Cool Season Vegetables <i>B.E. Platts, M.D. Cahn, R.B. Holden and M.G. Malanka</i>	561
Water Use Efficiency of Field Grown Chardonnay Grapevines Subjected to Partial Rootzone Drying and Deficit Irrigation <i>S. Pudney and M.G. McCarthy</i>	567
Sap Flow, Trunk Diameter and Plant-water Relations Parameters as Stress Indicators of Apricot Trees <i>M^oC. Ruiz-Sánchez, A. Torrecillas, E. Nicolás, M^oF. Ortuño, J.M. Abrisqueta, J.J. Alarcón, R. Domingo and A. Pérez-Pastor</i>	575
Effect of Salinity on Evapotranspiration and Yield of San Joaquin Valley Pistachios <i>B.L. Sanden, L. Ferguson, H.C. Reyes and S.R. Grattan</i>	583
Determining When to Initiate Irrigation of Orange Trees <i>C. Germanà and V. Sardo</i>	591
Physiological Indicators of Plant Water Status as Criteria for Irrigation Scheduling in Table Grapes cv. Crimson Seedless, Irrigated by Drip <i>G. Selles, R. Ferreyra, I. Muñoz and H. Silva</i>	599
Performance of Landscape Ornamentals Given Irrigation Treatments Based on Reference Evapotranspiration <i>D.A. Shaw and D.R. Pittenger</i>	607
Soil CO ₂ Flux Measurements in Vineyard Ecosystem <i>C. Sirca, C. Asunis, D. Spano, A. Arca and P. Duce</i>	615
A Simulation Model for ET of Applied Water <i>R.L. Snyder, S. Geng, M.N. Orang, J.S. Matyac and S. Sarreshteh</i>	623
Estimate of Mass and Energy Fluxes over Grapevine Using Eddy Covariance Technique <i>D. Spano, P. Duce and R.L. Snyder</i>	631
Fruit Yield and Tree Growth for Various Irrigation Methods at Pitesti-Maracineni in the 'Golden Delicious' Apple Cultivar <i>N. Tanasescu and Cr. Paltineanu</i>	639
Use of a Tensiometer-Based Control System to Reduce Irrigation of Cut Flower <i>Dianthus caryophyllus</i> 'Santorini' whilst Maintaining Flower Yield and Quality <i>R.D. Taylor, B.W.W. Grout and J. Hill</i>	647
Irrigation Scheduling of Drip-Irrigated Vegetable Crops Grown in Greenhouses Using Continuous Soil Moisture Monitoring <i>R.B. Thompson, M. Gallardo and M.D. Fernandez</i>	653
Influence of Irrigation and Fertilization on Performances of Young Apple Trees <i>S. Tojnko and Z. Cmelik</i>	661

Irrigation Water Requirements of Strawberries
T.J. Trout and J. Gartung

665

Gravel Vertical Mulching for Improving Water Use Efficiency of Drip
Irrigated Orchards
S. Yanni, M.N. Nimah and I. Bashour

**PROCEEDINGS OF THE
IXth INTERNATIONAL PEAR SYMPOSIUM**

Convener

K.I. Theron

Stellenbosch, South Africa

February 1-6, 2004

**ISHS Fruit Section
ISHS Working Group on European and Asian Pears**

**Acta Horticulturae 671
April 2005**

LIST OF CONTENTS

Foreword	5
List of Contents	7
List of Authors	15
List of Participants	17
Plenary Papers	
A More Holistic View on the Hormonal Interactions among Different Organs in a Fruit Tree <i>F. Bangerth</i>	25
Evolution of the Pear Training Model in South Africa <i>D.K. Strydom and N.C. Cook</i>	37
Status of the Pear Industry in South America <i>E.E. Sánchez</i>	41
Pear Production in the North America <i>C.F. Seavert</i>	45
Status of the Pear Production in Europe <i>T. Deckers and H. Schoofs</i>	47
Status of the Pear Industry in Asia <i>T. Saito, C. Fang, S. Shin, H.S. Hwang and M. Sharifani</i>	57
The Status of the Pear Industry in Australasia <i>L.R. Brewer and V. Hilton</i>	65
Status of the Pear Industry in Africa, with Specific Reference to South Africa <i>C.H. Ferrandi, P.W. van der Merwe and M. Huysamer</i>	73
Fruit Quality	
Red Colour Development and Loss in Pears <i>W.J. Steyn, S.J.E. Wand, D.M. Holcroft and G. Jacobs</i>	79
Reflective Mulch Improves Fruit Size and Flower Bud Formation of Pear cv 'Clara Frijs' <i>M. Bertelsen</i>	87
Early Prediction of Ripening and Storage Quality of Pear Fruit in South Africa <i>E. Lötze and O. Bergh</i>	97
Use of Evaporative Cooling to Improve 'Rosemarie' and 'Forelle' Pear Fruit Blush Colour and Quality <i>S.J.E. Wand, W.J. Steyn, D.H. Holcroft, M.J. Mdluli, K. van den Dool and G. Jacobs</i>	103

Fluorescence Imaging to Study Physiological Changes in ‘Conference’ Pears during a Shelf-life Experiment <i>C. Huybrechts and R. Valcke</i>	113
Effect of 6-BA and NAA as Thinning Agents of ‘Conference’ Pear <i>P. Vilardell, J. Carbó, M. Casals, J. Bonany, L. Asín and R. Dalmau</i>	119
Reproductive Biology	
Morphology and Histology of the Nectary in Hungarian Local Pear Cultivars <i>Á. Farkas</i>	127
Application of S-RNase Allele Molecular Analysis as a Means for Elucidating Low Yields in the Pear Orchard <i>M. Goldway, R.A. Stern, S. Shafir and A.H. Zisovich</i>	137
Increasing the Yield of ‘Spadona’ Pear (<i>Pyrus communis</i> L.) by Appropriate Utilization of Beehives <i>R.A. Stern, A.H. Zisovich, S. Shafir, A. Dag and M. Goldway</i>	143
The Synthetic Cytokinins CPPU and TDZ Prolong the Phase of Cell Division in Developing Pear (<i>Pyrus communis</i> L.) Fruit <i>M.A. Flaishman, A. Shargal and L. Shlizerman, R.A. Stern, S. Lev-Yadun and G. Grafi</i>	151
Study on Compatibility and Pollen Tube Growth of Some Asian Pear (<i>Pyrus serotina</i> Rehd.) Cultivars <i>K. Arzani, M. Koushesh-Saba and F. Ghanati</i>	159
Reproductive Bud Development of Pears (<i>Pyrus communis</i> L.) with Emphasis on the Bourse Shoot <i>L.P. Reynolds, G. Jacobs and K.I. Theron</i>	165
The Effect of Scoring During Flower Induction or the Initiation Phase on Return Bloom in <i>Pyrus Communis</i> L. <i>L.P. Reynolds, G. Jacobs and K.I. Theron</i>	171
Flowering Date Prediction in ‘Rocha’ Pear under Mild Winter Conditions <i>J.P. De Melo-Abreu, J.M. Silva and N.G. Barba</i>	177
Breeding, Cultivars and Evaluation	
Progress and Challenges of the South African Pear Breeding Program <i>J.P. Human</i>	185
Progress in Pear Breeding at the University of Bologna <i>S. Musacchi, V. Ancarani, A. Gamberini, B. Giatti and S. Sansavini</i>	191
Characteristics of an F ₁ Generation Arising from Butirra Precoce Morettini × Bella di Giugno <i>M.D. Milutinović, M. Nikolić and B. Tanasković</i>	195
Orchard Comparisons of New Quince and <i>Pyrus</i> Rootstock Clones <i>D. Johnson, K. Evans, J. Spencer, T. Webster and S. Adam</i>	201

Progress in the National Asian Pear Project: A Study on the Adaptation of Some Asian Pear (<i>Pyrus serotina</i> Rhed) Cultivars to Iranian Environmental Conditions <i>K. Arzani</i>	209
Field Performance of Fire Blight Tolerant, <i>Pyrus communis</i> Selections in South Carolina <i>G.L. Reighard, D.R. Ouellette and K.H. Brock</i>	213
'Rocha', the Pear from Portugal <i>J.M. Silva, N.G. Barba, M.T. Barros and A. Torres-Paulo</i>	219
Heritability of Morphological and Architectural Characters in Three Pear Progenies <i>E. Costes, A. Acou, A. Belouin, M. Le Lezec and M.H. Simard</i>	223
Breeding Pears for Warm Climates in Mexico <i>F.I.A. Rumayor, C.A. Martínez and R. Vázquez</i>	229
Breeding of Homozygotes of Self-Incompatible Haplotype in Japanese Pear (<i>Pyrus pyrifolia</i> Nakai) <i>T. Saito, Y. Sawamura, N. Takada, M. Shoda, O. Terai, K. Abe and K. Kotobuki</i>	233
Breeding of Pear Rootstocks. First Evaluation of New Inter-specific Rootstocks for Tolerance to Lime-induced Chlorosis and Induced Vigour under Field Conditions <i>J. Bonany, R. Dolcet-Sanjuan, E. Claveria, I. Iglesias, L. Asin and M.H. Simard</i>	239
Old Pear Varieties in Northern Italy <i>T. Eccher and R. Pontiroli</i>	243
Variability in the Wild Pear Population in West Serbia <i>M.D. Milutinovic, G. Djakovic, M.M. Milutinovic, R. Miletic and M. Zikic</i>	247
A Selection from <i>Pyrus betulaefolia</i> as a New Pollinator for the Main <i>Pyrus communis</i> Cultivars <i>M. Le Lezec, A. Belouin and M.H. Simard</i>	253
Genetics and Biotechnology	
Molecular Genetic Studies on Pears (<i>Pyrus</i> spp.) in the Western Cape <i>M.M. van Dyk, G. Koning, Z. Simayi, S. Booij, R. Maharaj, M.C. Selala, M.G. du Preez, D.J.G. Rees, I.F. Labuschagné and L. Warnich</i>	259
Ploidy Level Evaluation of Rootstock Selections and <i>Pyrus</i> Genus Accessions <i>M.H. Simard and D. Demilly</i>	267
Resumption of Cyclin B and Histone H1 Kinase Activity Marks Reproductive Bud Break in Pear Grown in the Hot Climate of Israel <i>M.A. Flaishman, Y. Brayer, G. Grafi and A. Shargal</i>	275

Expression of the Health-Beneficial Stilbenes in Transgenic ‘Spadona’ Pear (<i>Pyrus communis</i>)	283
<i>M.A. Flaishman, L. Shlizerman, Y. Cohen, Z. Kerem and L. Sivan</i>	
<i>Pyrus</i> Microsatellite Markers from GenBank Sequences	289
<i>N.V. Bassil, J.D. Postman and C. Neou</i>	
Molecular Typing of Red and Green Phenotypes of ‘Bon Rouge’ Pear Trees, with the Use of Microsatellites	293
<i>S. Booï, M.M. van Dyk, M.G. du Preez, D.J.G. Rees and I. Labuschagné</i>	
Stress Induced Differential Gene Expression Patterns for Red and Green Phenotypes of ‘Bon Rouge’ Pear Trees (<i>Pyrus communis</i>)	299
<i>M.G. du Preez and D.J.G. Rees</i>	
Development of Microsatellite Markers for Marker-Assisted Breeding in Pears (<i>Pyrus</i> spp.)	307
<i>M.M. van Dyk, G. Koning, Z. Simayi, S. Booï, R. Maharaj, M.C. Selala and D.J.G. Rees</i>	
Development of Molecular Markers Linked to Several Fruit Traits in Oriental Pear	315
<i>D. Kim, J.H. Hwang, Y.U. Shin, I.S. Shin, H.J. Lee, S.S. Hong and S.J. Kang</i>	
Postharvest	
Extending Shelf-life of Partially Ripened 'd'Anjou' Pears by 1-Methylcyclopropene Treatment	325
<i>J. Bai and P.M. Chen</i>	
The Effect of SmartFresh™ (1-methylcyclopropene) on Post Harvest Storage Quality of ‘Bon Chretien’ Pears	333
<i>I. Crouch</i>	
Sensory Evaluation of New Pear Cultivars	341
<i>P. Vaysse, P. Reynier, L. Roche and O. Lavialle</i>	
Sensory Evaluation from a Consumer Perspective and its Application to ‘Abate Fetel’ Pear Fruit Quality	349
<i>S. Predieri, E. Gatti, F. Rapparini, L. Cavicchi and R. Colombo</i>	
Consumer Sensory Evaluation of Pear Cultivars in the Pacific Northwest, USA	355
<i>J. Turner, J. Bai, A. Marin and A. Colonna</i>	
‘Concorde’ Pear Flavor, Texture, and Storage Quality Improved by Manipulating Harvest Maturity	361
<i>E.A. Mielke, S.R. Drake and D.C. Elfving</i>	
Mealiness of ‘Forelle’ Pears – <i>Quo Vadis?</i>	369
<i>E.M. Crouch, D.M. Holcroft and M. Huysamer</i>	
The Effect of Fruit Maturity and Storage Duration on Friction Discolouration of ‘Packham’s Triumph’ and ‘Doyenne du Comice’ Pears	377
<i>G.E. Burger, H.M. Griessel and M. Huysamer</i>	

Combining Ability of Fruit Appearance and Eating Quality in Pears <i>S.M. Liu, S.M. Richards and G.R. McGregor</i>	385
Volatile Constituents and Pear Aroma Studied by Dynamic Headspace Technique <i>F. Rapparini, E. Gatti and S. Predieri</i>	393
The Effect of 1-MCP on the Quality of ‘Conference’ and ‘Abbé Fétel’ Pears <i>P. Eccher Zerbini, P. Cambiaghi, M. Grassi and A. Rizzolo</i>	397
Production and Economical Aspects	
Remaining Globally Competitive in the U.S. Tree Fruit Industry with the National Tree Fruit Technology Roadmap <i>C.F. Seavert</i>	407
The Economic Costs and Returns of Establishing and Producing High- Density Pears in Hood River, Oregon, USA <i>C.F. Seavert, J. Moore and S. Castagnoli</i>	413
The Economic Costs and Returns of Producing Pears in Hood River, Oregon, USA <i>C.F. Seavert, J. Moore and S. Castagnoli</i>	421
An Evaluation of Site-Specific Management Strategies in the U.S. Pear Industry <i>C.F. Seavert, T. Righetti and S. Castagnoli</i>	429
Pear Production in Chile: Situation and Trends <i>K. Sagredo and T. Cooper</i>	437
Planting Systems	
An Architectural Analysis of Pear Cultivars Grown under South African Conditions and the Relevance to Local Maintenance Pruning Strategies <i>N.C. Cook and P. du Plooy</i>	443
Effect of Pruning Severity and Branch Quality on Fruit Set and Fruit Dry Weight of ‘Packham’s Triumph’ Pears (<i>Pyrus communis</i> L.) <i>L.P. Reynolds, G. Jacobs and K.I. Theron</i>	451
Comparison of the Yield, Labour Requirement and Fruit Quality of ‘Conference’ Pears under Five Intensive Training Systems in Spain <i>L. Asin, R. Montserrat, J. Carbó, P. Vilardell and M. Carrera</i>	455
Response of Training System Planting Density and Cultivar in Pear <i>S. Musacchi, V. Ancarani, A. Gamberini, M. Gaddoni, M. Grandi and S. Sansavini</i>	463
Financial Result of Different Planting Systems for ‘Conference’ Pears <i>J. Vercaammen</i>	471

Scion/Rootstock Influence on Grafting Success, Early Performance, Tree Survival and Efficiency of Nutrient Uptake of Some Asian Pear (<i>Pyrus Serotina</i> Rehd) Cultivars <i>K. Arzani, H. Khoshghalb and G. Karimzadeh</i>	477
Pear Rootstock Trial: Behavior of ‘Conference’ and ‘Doyenné du Comice’ on Two Quince and Five OHxF Selections <i>M. Carrera, M.T. Espiau and J. Gómez-Aparisi</i>	481
Performance of ‘Conference’ Pear on Self-rooted Trees and Several Old Home × Farmingdale, Seedling and Quince Rootstocks in Spain <i>I. Iglesias and L. Asín</i>	485
Nutrient Distribution and Requirement of ‘Forelle’ Pear Trees on Two Rootstocks <i>P.J.C. Stassen and M.S. North</i>	493
Growth Regulation	
Natural or Chemical Growth Regulation in Pear <i>T. Deckers, H. Schoofs and E. Smolders</i>	503
Shoot Growth, Fruit Production and Return Bloom in ‘Conference’ and ‘Doyenné du Comice’ Treated with Regalis (Prohexadione-Calcium) <i>F.M. Maas</i>	517
Effect of Prohexadione-Ca on Growth Regulation, Yield, Fruit Set and Return Bloom, in ‘Blanquilla’ and ‘Conference’, the Two Main Pear Cultivars Grown in Spain <i>L. Asín, R. Dalmau, J. Bonany, J.M. Pages and P. Vilardell</i>	525
Root Pruning: a Valuable Alternative to Reduce the Growth of ‘Conference’ <i>J. Vercammen, G. van Daele and A. Gomand</i>	533
The Effect of Different Rates of Prohexadione-Calcium and Girdling on Shoot Growth and Fruit Quality When Applied to Different Pear Cultivars <i>J.J. Meintjes, P. Stassen and K.I. Theron</i>	539
Pest Management	
Post-harvest Control of the Grain Chinch Bug <i>Macchiademus diplopterus</i> (Heteroptera: Lygaeidae) on Pears in the Western Cape Province, South Africa <i>P. Addison</i>	549
Suppression of Codling Moth <i>Cydia pomonella</i> L. (Lepidoptera: Tortricidea) Populations in South African Apple and Pear Orchards Using Sterile Insect Release <i>M.F. Addison</i>	555
Cost of Production for Transitioning from Conventional Codling Moth Control to Aerosol-Released Mating Disruption (“Puffers”) in Pears <i>R.B. Elkins, K.M. Klonsky and R.L. DeMoura</i>	559

Monitoring Codling Moth in Four Pear Cultivars with the Pear Ester <i>A.L. Knight, P. VanBuskirk, R.J. Hilton, B.G. Zoller and D.M. Light</i>	565
Resistance of Some <i>Pyrus communis</i> Cultivars and <i>Pyrus</i> Hybrids to the Pear <i>P. Robert and T. Raimbault</i>	571
The Challenges of Implementing a Successful IPM Program in Pear <i>P.D. VanBuskirk and R.J. Hilton</i>	577
Disease Management	
Control of Fire Blight by <i>Pseudomonas fluorescens</i> A506 Introduced into Unopened Pear Flowers <i>R.B. Elkins, C.A. Ingels and S.E. Lindow</i>	585
Fruit and Leaf Incidence of Pear Scab (<i>Venturia pirina</i> Aderh.) in Mixed European and Asian Pear Progenies <i>L. Brewer, P. Alspach and V. Bus</i>	595
Scab Resistance in <i>Pyrus</i> Germplasm <i>J.D. Postman, R.A. Spotts and J. Calabro</i>	601
Powdery Mildew Resistance in <i>Pyrus</i> Germplasm <i>M. Serdani, R.A. Spotts, J.M. Calabro and J.D. Postman</i>	609
Test of Fungicides against <i>Stemphylium vesicarium</i> on Pear with or without a Warning System <i>P.F. de Jong, B. Heijne and A. Boshuizen</i>	615
General	
Age Determination and Tree-ring Growth Dynamics in Old Trees of <i>Pyrus</i> <i>communis</i> 'Angelica' <i>D. Neri, C. Urbinati, G. Savini and A. Sanchioni</i>	623
In Vitro Rooting of Portuguese Pear Cultivars (<i>Pyrus communis</i>) in Response to Changes in Auxin Induction and Dark Period Treatments <i>M.T.F. Barros, C.I. Hipólito and C.G.M. Baptista</i>	631

El procesado de los alimentos:
aspectos tecnológicos,
de calidad y nutricionales

ACTAS

Bajo Aragón - Caspe
8 - 12 de julio de 2002

CENTRO DE ESTUDIOS COMARCALES DEL BAJO ARAGÓN - CASPE

Institución «Fernando el Católico»

Caspe, 2003

ÍNDICE

Presentación.....	5
Prólogo.	7
Desarrollo y perspectivas de la industria agroalimentaria en Aragón, <i>Luis Miguel Albisu Aguado</i>	11
El procesado de la carne y de los productos cárnicos, <i>José Antonio Beltrán Gracia</i>	19
La industria enológica en Aragón, <i>Ernesto Franco Aladrén</i>	29
Mitos y fraudes relacionados con los alimentos y la nutrición, <i>Miguel Calvo Rebollar</i>	39
Análisis sensorial: tipos y aplicaciones, <i>Pedro Roncalés Rabinal</i>	49
El procesado del pescado y de los productos derivados, <i>Juan José Murillo Ramos</i>	67
Las vitaminas y la salud, <i>Luis Bernues Vázquez</i>	97
Proceso de elaboración de aceites vegetales, <i>María Dolores Pérez Cabrejas</i>	117
La denominación de origen en la industria alimentaria, <i>Miguel Lorente Blasco</i>	129
La transformación de los alimentos por extrusión, <i>María Ángeles Martín Cabrejas</i>	143
Nuevas tecnologías en la conservación de frutas y hortalizas, <i>Vicente Sanchís Almenar y Meritxell Planes Gelonch</i>	149
Elaboraciones culinarias, <i>Francisco Lahuerta Asenjo</i>	159
El etiquetado de los alimentos: normativa y control, <i>Agustín Ariño Moneva</i>	171
El procesado de la leche de los productos lácteos, <i>Lourdes Sánchez Paniagua</i>	197
Contaminación abiótica de los alimentos: riesgos sanitarios y control, <i>Regina Lázaro Gistau</i>	207
El control de la calidad en la industria alimentaria: mecanismos y organismos, <i>Ángel Bonilla Polo</i>	223
Dieta mediterránea, <i>José González Bonillo</i>	257
Alimentación y Cáncer, <i>Juan Francisco León Puy</i>	267

LA AGRICULTURA EN EL UMBRAL DEL SIGLO XXI

Ediciones Mundi-Prensa

Madrid • Barcelona • México

1999

ÍNDICE

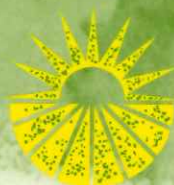

Prólogo, por José Lostao Camón	9
Tendencias de la agricultura en el mundo	11
— Tendencias agrarias mundiales en el siglo XXI, por <i>Alex F. McCalla</i>	13
— La agricultura en Nueva Zelanda, por <i>Wilbur Dovey</i>	35
— Reflexiones sobre la cooperación al desarrollo y la ayuda alimentaria, por <i>Alberto Navarro</i>	39
— El futuro de la agricultura desde la perspectiva de la FAO, por <i>Javier Pérez de Vega</i>	43
— Las aportaciones de los centros internacionales de investigación agraria, por <i>Elías Fereres Castiel</i>	51
— La ingeniería genética, por <i>Francisco García Olmedo</i>	55
— Resumen de intervenciones, relator <i>Julián Briz Escribano</i>	57
— Biografías de Ponente y Panelistas	59
La PAC y el futuro de la agricultura europea	63
— La PAC y el futuro de la agricultura europea, por <i>Arlindo Cunha</i>	65
— El proceso de liberalización del comercio mundial agrario, por <i>José Barreiro Seoane</i>	77
— Dos visiones de Europa, por <i>Luis Vicente Barceló Vila</i>	81
— Cohesión y financiación de la PAC, por <i>Carlos Díaz Eimil</i>	87
— Reflexiones sobre el futuro de la agricultura europea, por <i>Luis Miguel Albisu</i>	93
— Resumen de intervenciones, relator <i>Eduardo Díez Patier</i>	99
— Biografías de Ponente y Panelistas.....	101

Las incertidumbres de la agricultura española	105
— Las incertidumbres de la agricultura española, por <i>Alberto Oliart</i>	107
— Rasgos básicos de la agricultura española, por <i>Ángel Luis Álvarez Fernández, Antonio Carpintero Sáiz y Alicia Villauriz Iglesias</i>	127
— Los márgenes para una política agraria propia, por <i>Gerardo L. García Fernández</i>	153
— Virtualidad de las políticas agrarias autonómicas, por <i>Antonio Gámiz López</i>	161
— La ingeniería agronómica española frente a los profundos cambios que se avecinan, por <i>José María Mateo Box</i>	167
— Política de regadíos, por <i>José María Sumpsi Viñas</i>	171
— La encrucijada de la cadena agroalimentaria, por <i>Horacio González Alemán</i>	175
— El punto de vista del empresario agrario, por <i>Carlos Serra Goizueta</i>	179
— El futuro de las explotaciones agrarias, por <i>Pedro Barato Triguero</i>	185
— El agricultor profesional ante los retos del siglo XXI, por <i>José Manuel de las Heras Cabañas</i>	189
— Aplicar la cohesión en la PAC: Modular las ayudas directas, por <i>Fernando Moraleda Quílez</i>	193
— Resumen de intervenciones, relator <i>Pedro Urbano Terrón</i>	199
— Biografías de Ponente y Panelistas	201
Conclusiones	207
— Conclusiones «La agricultura en el umbral del siglo XXI»	209
— Conclusions «Agriculture on the threshold of the XXIth century»	215
Apéndice: La Jornada Internacional	219
— El espíritu de FORO AGRARIO, por <i>José Lostao Camón</i>	221
— La apertura de la Jornada	225
— Organización de la Jornada	227
— Protocolo para el desarrollo de la Jornada	229
— Relación de asistentes	233
Apéndice: FORO AGRARIO	243
— Texto de presentación	245
— Comisión Rectora	248
— Consejo de Patronos	249
— Comité Ejecutivo	250
— Grupo de Expertos «Grupo de Amigos de Foro»	251

UNA ALTERNATIVA PARA EL MUNDO RURAL DEL TERCER MILENIO

Valencia, del 21 al 26 de septiembre de 1.998

**ACTAS DEL
III CONGRESO DE
LA SOCIEDAD
ESPAÑOLA DE
AGRICULTURA
ECOLÓGICA**

SEAE

CONTENIDO

M. Pajarón. Valores agroecológicos de los sistemas agrarios actuales: el olivar	17
P. Girona. Valores agroecológicos de la agricultura tradicional valenciana: el arroz	31
J. Quilis Siurana. Valores agroecológicos de la huerta de Valencia: las acequias	41
I. Torres, Y. Pouliquen y F. Malvar. Valores agroecológicos de las praderas en Galicia	45
A. C. Perdomo Molina. Ejemplos de la diversidad biológica, ecológica y cultural del agrosistema ganadero tradicional de Los Rodeos (Tenerife-Islas Canarias)	61
C. Zaragoza, J. Aibar, J. Caveró, P. Ciria, M. V. Cristobal, A. de Benito, A. García Martín, G. García Muriedas, J. Hernández, J. Labrador, C. Lacasta, A. Lafarga, J. A. Lezaun, R. Meco, A. Moyano, M. J. Negro, M. L. Solano, F. Villa e I. Villa. Manejo ecológico de agrosistemas en secanos semiáridos. Resultados de doce ensayos sobre fertilización y escarda	75
R. Meco, C. Lacasta, E. Estalrich y G. García-Muriedas. La Agricultura Ecológica en cereales, una alternativa para zonas semiáridas..	83
L. Hurtado Ruiz, J. M. Ayanz Jurado. Comparación de los beneficios por hectárea del cultivo convencional y el cultivo ecológico del olivar en los primeros años de reconversión	95
M. P. Suárez, E. P. López, J. Ordovás, I. Pérez e I. Aguirre. Utilización de distintos productos para mejorar el enraizamiento en estaquillado semileñoso en olivo	101
S. Cubero e I. Amián. Asociación de maíz con alfalfa. Experiencia Piloto en Agricultura Ecológica. «Finca El Aguilarejo» Diputación de Córdoba	105
A. Domínguez y J. Roselló. Comportamiento de la asociación tradicional lechuga-coliflor con técnicas ecológicas; diferencias respecto a su monocultivo	115
P. Domínguez Gento y A. Domínguez Gento. Jardinería ecológica: Necesidad y criterios básicos	121
A. Moyano, M. Benito, N. Carramiñana y M ^a P. Ciria. Control mecánico de malas hierbas y su efecto sobre la producción de cebada y trigo en Soria	129
F. Villa Gil, J. A. Sasot Bayona, R. Balduque Martín y G. Valencia Sancho. Ensayo de control de <i>Cydia pomonella</i> o <i>Carpocapsa</i> combinando tratamientos biológicos y confusión sexual sobre peral y manzano en Aragón	135

J. Calvillo. Los miridos del G. <i>Dicyphus</i> depredadores naturales en el control biológico del cultivo de tomate en invernadero: pautas para la gestión de agroecosistemas	143
J. García-Jiménez, A. Vicent, J. Busto, M. J. Moya, R. Sales y J. Armengol. Uso de la termoterapia para el control de la podredumbre negra de la chufa (<i>Cyperus esculentus</i> L.) causada por <i>Rosellinia necatrix</i> Prill	157
N. Pérez Hidalgo y M. P. Mier Durante. Curvas de vuelo de algunos áfidos (Homoptera, Aphididae), plagas potenciales de cultivos de leguminosas, en la vega del río Tuerto (León)	167
T. Campos, J. Rosello, M. D. Gomis, M. R. Hermosa, I. Grandona y E. Monte. Control biológico de la podredumbre húmeda de la lechuga, mediante la aplicación al agua de riego del hongo antagonista <i>Trichoderma</i> spp	179
T. Campos y J. Roselló. Estudio preliminar de los aislamientos de los hongos <i>Chaetomium elatum</i> y <i>Chaetomium globosum</i> como antagonistas frente a <i>Rhizoctonia solani</i>	185
M. J. Molina, M. D. Soriano y J. V. Llinares. La degradación de las propiedades del suelo en relación a su uso en dos sistemas agroforestales de la Comunidad Valenciana: implicaciones ecológicas ante un hipotético cambio climático	191
S. de Alba Alonso. El arrastre del suelo durante las prácticas de laboreo con vertedera en laderas con pendiente, un proceso per se de degradación física del suelo: erosión por laboreo	203
F. Ingelmo, M. Villalba y F. Pomares. Retención de agua en suelos de cítricos con manejo ecológico y con manejo convencional. Modelos de regresión	215
L. Suances, J. Pérez-Sarmentero y A. Molina. Actividad enzimática de esterasas, fosfatasas y β -galactosidasas en suelos de tres fincas de pastos permanentes con diferente altitud	223
R. Albiach, A. Gómez, F. Pomares y R. Canet. Efecto del tipo de fertilización sobre la actividad biológica del suelo en reconversión a la agricultura ecológica	231
G. Rocuzzo, F. Pomares, M. Estela, F. Tarazona, M. O. Sala, R. Albiach, T. Campos, C. Diego, V. Borrás y D. Yuste. Calidad del suelo en huertos de cítricos ecológicos	239
F. Pomares, M. Estela, F. Tarazona, M.O. Sala y R. Canet. Estado de contaminación por metales pesados en suelos de cítricos con cultivo ecológico	247
E. Farrús, M. J. Rebassa, J. M. Soler y J. Vadell. Relaciones entre parámetros fisicoquímicos de las tierras de cultivo en explotaciones de Agricultura Ecológica de la isla de Ibiza	253

E. Farrús, M.J. Rebassa, G. Lladó, A. Bonet y J. Vadell. Calidad del agua de riego en Agricultura Ecológica. Caso de la isla de Mallorca	261
A. Domínguez, J. Roselló, R. Girona y M. J. Ruiz. Comparación de diversos sustratos para su utilización en viveros ecológicos.....	269
A. Domínguez Gento y J. Roselló Oltra. Comparación de tres tipos de acolchados para hortalizas ecológicas	279
C. J. González, C. E. Alvarez, F. Pomares y M. Benitez. Efectos de fertilización en papas con compost, gallinaza y combinaciones de ambos	285
A. Sánchez, I. Guillén, R. Madrid, A. Belmonte y A. Oliva. Estudio de la influencia de la fertilización orgánica en la calidad de la almendra cultivada en condiciones de secano. (I) Evolución de macronutrientes	293
A. Gómez, F. Pomares y C. Baixauli. Valor nutritivo de la alcachofa y la lechuga bajo diferentes tipos de fertilización	299
V. Castell Roig. Recuperación y conservación de variedades locales de cultivo tradicional: Comunidad Valenciana.....	309
J. Roselló, A. Domínguez y M. I. Rodrigo. Tipificación y estudio productivo de diversas variedades tradicionales de tomate, calabaza y melón, cultivados con métodos ecológicos	315
J. J. Soriano Niebla, G. I. Guzmán Casado, S. F. García Jiménez, M. Figueroa Zapata y A. Lora González. Recuperación de variedades locales de hortalizas para su cultivo ecológico	323
M. A. Díaz del Cañizo, G. I. Guzmán Casado, J. J. Soriano Niebla y N. Álvarez Febles. Recuperación de variedades tradicionales locales de cultivos y del conocimiento a ellas asociado, para su conservación, uso y manejo, en las comarcas de Antequera (Málaga) y Estepa (Sevilla)	333
J. García-Camarero, C. M. Martí, D. López-García, E. Sanchis y F. Ingelmo. Morfología y desarrollo de diez especies mediterráneas resistentes a la sequía y de uso pascícola, ornamental y aromático	343
J. Alegre, E. Sobrino, A. Guerrero, J. L. Tenorio, E. F. de Andrés, J. L. Ceresuela y L. Ayerbe. Biomasa foliar aportada al suelo por leguminosas arbustivas del género <i>Medicago</i>	357
N. Olea, A. Rivas, M. F. Olea-Serrano, M. J. Molina. Contaminantes químicos y salud.....	363

A. F. Hernández, A. Pla, M. A. Gómez, G. Pena, F. Gil, G. Pino y L. Rodrigo. Susceptibilidad a los insecticidas organofosforados en trabajadores de invernadero: importancia de los marcadores bioquímicos	369
A. M. García García. Efectos teratógenos de la exposición a pesticidas	379
A. Molina. Alimentos Ecológicos y Vitalidad	391
M. M. Millán. Contaminación ambiental en el sur de Europa	401
J. L. Porcuna, B. S. Gimeno, M. J. Sanz, C. Ocón y A. Jiménez. Predisposición de dos variedades de tomate a desarrollar virosis en función de su exposición a concentraciones de ozono	411
M. J. Sanz Sánchez, J. L. Porcuna Coto, C. Jordá Gutiérrez, C. Martín Lima, P. V. Cámara Badenes, A. Jiménez López; E. Calvo Roselló y V. Calatayud Oriente. Efecto del Ozono sobre el crecimiento y los niveles de infección vírica en Melón tipo Galia (var. "Yuppi")	421

System Dynamics and Innovation in Food Networks 2008

*Proceedings of the 2nd International European Forum on System Dynamics and Innovation in
Food Networks, organized by the International Center for Food Chain and Network
Research, University of Bonn, Germany
officially endorsed by the European Association of Agricultural Economists (EAAE)
as 110th EAAE-Seminar, February 18-22, 2008, Innsbruck-Igls, Austria*

edited by

M. Fritz, U. Rickert, G. Schiefer

Content	Page
Session: Sustainability and Chain Management	
Identifying the Implications of most Warming Foods: A Pilot Analysis <i>Peter Hines, Keivan Zokaei, Barry Evans, Jo Beale, Mara Miele and Matthew Cole, UK</i>	3
Innovation and Food System Sustainability: Public Concerns vs Private Interests <i>Valeria Sodano, Italy</i>	9
Session: Dependencies within Chains	
Economic Evaluation of Food Traceability Systems through Reference Models <i>Freddy Brofman, Marian Garcia and Diogo Souza Monteiro, UK</i>	19
Session: Innovation	
Innovation in Traditional Food Networks <i>Xavier Gellynck and Bianka Kühne, Belgium</i>	33
An Innovative Tool to Assess Marketing Capabilities of Traditional Producers within the European Food Supply Chains <i>Alessandro Banterle, Laura Carraresi and Stefanella Stranieri, Italy</i>	43
Session: Bioenergy	
Analysis, Design and Implementation of Biodiesel Projects in Brazil <i>Aziz Galvão da Silva Júnior, Ronaldo Perez and Rodolfo Osório de Oliveira, Brazil</i>	55
Food Security, Food Chains and Bioenergy Challenges for a Sustainable Development Environment <i>Bernardo M.T. Reynolds S. Pacheco de Carvalho, Portugal</i>	65
The LP Model to Optimize the Biofuel Supply Chain <i>Franco Rosa, Italy</i>	77
Session: Sector Competition	
A Mosaic Type of Development: Food Districts and SMEs in the Italian Experience <i>Cristina Brasili and Roberto Fanfani, Italy</i>	95
The Effect of Competitive Advantage on the Economic Performance of Spanish Agro-Food Firms <i>Luis Miguel Albisu and Xhevrie Mamaqi, Spain</i>	113
Plenary 2: A Provisional Framework for Studying Information Connectivity in Food Networks	
A Provisional Framework for Studying Information Connectivity in Food Networks <i>Per Engelsest and Anniken Karlsen, Norway</i>	131

Plenary 3: Chain Modelling

- Abstraction and Modelling of Agri-Food Chains as Complex Decision Making Systems 147
Kim P. Bryceson and Carl S. Smith, Australia
- System Dynamics Simulation to Test Operational Policies in the Milk–Cheese Supply Chain. 161
Case Study: Piar Municipality, Bolivar State, Venezuela
Carlos Rodriguez Monroy¹, Joaquín Fuentes-Pila¹ and Wilfredo Guaita², Spain¹/Venezuela²

Session: Governance Issues

- Legitimizing Business Activities Using Corporate Social Responsibility: Is there a Need for 175
CSR in Agribusiness?
Matthias Heyder and Ludwig Theuvsen, Germany
- The Relationship between Supply Chain Coordination and Quality Assurance Systems: A 189
Case Study Approach on the German Meat Sector
Jan Bahlmann and Achim Spiller, Germany

Session: Consumer Focus

- Would Functional Agricultural Foods Improve Human Health? 203
Bruce W. Traill, M.H.P. Arnoult, S.A. Chambers, E.R. Deaville, M.H. Gordon, P. John, P.J. Jones, K.E. Kliem, S.R. Mortimer and J.R. Tiffin, United Kingdom
- Wine Argentinean Export Chain: A Case Study in the UK Market 213
H. Cetrángolo and Julián Briz, Spain
- Does Knowledge-Based Economy Speaks to Consumers? A French Case Study with Respect 225
to Food Products
Georges Giraud, Annick Lebecque, Corinne Amblard, Cécile Bord, Claire Sulmont-Ross and Yves Lefur, France
- Viability of Values and Attitudes Concerning Purchase Intentions and Benefit Attribution for 229
an Organic Sport Drink
Christoph Ameseder, Rainer Haas and Oliver Meixner, Austria

Session: Simulation of Networks

- Relational Contracting and Allocation of Decision Rights in the Agri-Food Industry: Producer 243
Contracts and Food Safety
Kostas Karantininis, Jesper T. Graversen and Hans Jacob Nymann Rasmussen, Denmark
- The Financial Value of Champagne Houses in a Cobweb Economy 269
Francis Declerck and L. Martin Cloutier, France/Canada

Session: Leadership in Chains/Networks

- The Role of Inter-Organisational Leadership in Agri-Food Value Chains 285
Lawrence B. Dooley and E. Luca, Australia
- Networks in Rural Economy: Valorising Endogenous and Exogenous Drivers of Innovation 293
Bert Vermeire, Xavier Gellynck, Hans de Steur and Jacques Viaene, Belgium

Session: Consumer Communication

Cucurbitaceae 88

**Proceedings of the EUCARPIA Meeting
on Cucurbit Genetics and Breeding**

***Comptes-rendus du Congrès EUCARPIA
sur la Génétique et la Sélection des Cucurbitacées***

Avignon - Montfavet (France)

May 31 - June 1-2 1988

C O N T E N T S

I - BREEDING FOR DISEASE RESISTANCE

Lectures

- . ALVAREZ J., LUIS M.
Varietal differences in virus infection time in muskmelon.----- 11
- . ESTEVA J., NUEZ F.
A yellowing disease on melon in the South East Coast of
Spain.----- 19
- . PINK D.A.C., WALKEY D.G.A.
Breeding cucumber mosaic resistant courgette at the Institute
of Horticultural Research, Wellesbourne.----- 25
- . QUIOT-DOUINE L., LECOQ H., QUIOT J.B., PITRAT M., LABONNE G.
Evidence for a biological and serological variability in
a potyvirus infecting cucurbits : the Papaya Ringspot
Virus (PRSV) .----- 35
- . COHEN Y., EYAL H., KENIGSBUCH D.
Genetics, nature and utilization of resistance to downy and
powdery mildews in muskmelon.----- 43
- . THOMAS C.E.
Physiological specialization in downy and powdery mildews
of Cucurbits.----- 51
- . PITRAT M., BLANCARD D.
Some aspects of resistance of muskmelon to downy mildew.----- 57
- . GROOT S.P.C., ZIJLSTRA S.
Breeding for a necrosis free powdery mildew resistance in
Cucumber.----- 63
- . PIVOVAROV V.F.
Cucumber breeding for general adaptive ability and resistance
to diseases...----- 69

Posters

- . BERTRAND F.
Culture and cloning methods for cucurbit powdery mildews
(Spaerotheca fuliginea Schlecht. ex. Fr.) Poll. and Erysiphe
cichoracearum DC ex Mecat).----- 75
- . BLANCARD D., PITRAT M., CARDINET C.
Research of scab resistance in Cucumis melo.----- 77
- . LABONNE G., QUIOT J.B., QUIOT-DOUINE L.
Virus epidemic and crop losses in Zucchini Squashes infected
by Papaya ringspot.----- 79
- . LEROUX J.P., MOLOT P.M.
New method of conservation of cucurbit powdery mildew
(Sphaerotheca fuliginea and Erysiphe cichoracearum) in
axenic conditions.----- 83

- . MEGNEGNEAU B., BRANCHARD M.
Toxicity of culture filtrates of different Fusarium oxysporum
f. sp. melonis pathotypes on muskmelon. _____ 85

II - FLORAL BIOLOGY AND SEED PRODUCTION

Lectures

- . ALVAREZ J.
Muskmelon hybrid seed production through ethephon-induced
feminization in andromonoecious cultivars. _____ 89
- . NIEGO S., GALUN E.
A novel procedure for the production of F1 hybrid cucumber
seeds. _____ 99
- . ZAGORCHEVA L.I.
Autonomous apomictic propagation and matromorphy in Cucumis
ficifolius A. Rich. and Cucumis anguria L. _____ 109

Posters

- . RISSER G., RODE J.C.
Natural parthenocarpy observed on melon cv. "Dvash Ha Ogen" _____ 113
- . ZURADZKA I.
Heredity of the number of female flowers in the node and
its influence upon yielding of cucumber fruits. _____ 115

III - HAPLOIDS, PROTOPLASTS AND SOMATIC EMBRYOGENESIS

Lectures

- . SAUTON A.
Doubled haploid production in melon (Cucumis melo L.) _____ 119
- . ZAGORCHEVA L., ALEXandrova M.
Haploid in Cucumis ficifolius A. Rich. and its vegetative
and generative progenies. _____ 129
- . BRANCHARD M., CHATEAU M., MEGNEGNEAU B., DEBEAUJON I.
Somatic embryogenesis and plant regeneration from cotyledon
callus culture of Cucumis melo. _____ 133

Posters

- . BRANCHARD M., CHATEAU M., GRANDCLEMENT C.
Isolation and culture of protoplasts of pumpkin (Cucurbita
pepo L.) _____ 137
- . DEBEAUJON I., BRANCHARD M.
Somatic embryogenesis from protoplast derived callus of
melon (Cucumis melo L.). _____ 139
- . SAVIN F., DECOMBE V., LE COUVIOUR M., RESTIER L., HALLARD J.
An improved technique for raising individual haploids of
muskmelon Cucumis melo L. by in situ gynogenesis : use of
the X-ray method. _____ 141
- . TRUONG-ANDRE I.
In vitro haploid plants derived from pollination by irra-
diated pollen on cucumber. _____ 143

IV - SPECIES VARIABILITY

Lectures

- . KORZNIIEWSKA A., RUCINSKA M., NIEMEROWICZ-SZCZYTT K.
Genes of the cucumber (Cucumis sativus L.) described at the
department of genetics and horticultural plant breeding.
Fascinating collection of mutants.----- 147

Posters

- . CORTES C., DIEZ M.J., NUEZ F.
Genebank of the polytechnical university of Valencia :
informatization of Cucurbitaceae.----- 153
- . KRASTEVA L., LOZANOV I.
Correlation links between some quantitative traits of water
melon collections.----- 155
- . NEYKOV S.
A complex study on cucumber cultivars of different geogra-
phical origin.----- 159

V - MISCELLANEOUS SUBJECTS

Lectures

- . ABADIA J., NUEZ F., ANDRES M.V., MORENO A.
Inheritance mode of earliness in muskmelon.----- 165
- . ANASTASIO G., CATALA M.S., PALOMARES S., COSTA J., NUEZ F.
Salt tolerance in wild cucurbits.----- 175
- . FANOURAKIS N.E.
Possibility of interspecific hybridization between Cucumis
metuliferus and Cucumis melo L. by reciprocal grafting.----- 181
- . LUZNY J., PASKO J., VASKO S.
A contribution to Cucurbita breeding in Czechoslovakia.----- 187
- . ZIJLSTRA S., GROOT S.P.C.
The influence of different glasshouse cucumber genotypes as
rootstock or as scion on growth and early fruit production.----- 193

Posters

- . FICCADENTI N., D'AMORE R., PORCELLI S.
Study of the relationship between hybrids and environment
conditions through some particular agronomical techniques
in melon (Cucumis melo L.)----- 201
- . GUSEVA L.
Methods of cucumber breeding for mechanical harvesting in
the open ground.----- 203
- . KASRAWI M.A.
Effects of plant density and row arrangement on production
of parthenocarpic cucumber (Cucumis sativus L.)----- 205
- . PITRAT M., FERRIERE C., RICARD M.
Research of genetic linkages in muskmelon.----- 207

SCIENTIFIC CONTRIBUTIONS

GENETICS AND BREEDING

Çaglar G. & Abak, K. (oral) The effects of season and irradiation doses on haploid embryo production in cucumber (<i>Cucumis sativus</i> L.)	25
Lebeda, A., Křístková, E. & Kubaláková, M. (oral) Interspecific hybridization of <i>Cucumis sativus</i> x <i>Cucumis melo</i> as a potential way to transfer resistance to <i>Pseudoperonospora cubensis</i>	31
Poostchi, I. (oral) Interspecific fertility relationships in cultivated species of <i>Cucurbita</i> in Iran	38
Paris, H.S. (oral) Genes affecting stem and fruit color intensity of straightneck squash	43
Pitrat, M., Risser, G., Bertrand, F., Blancard, D. & Lecoq, H. (oral) Evaluation of a melon collection for disease resistances	49
Maynard, D.N. (oral) Performance of tropical pumpkin inbreds and hybrids	59
Martínez, J.J., Warid, W.A. & Loaiza, J.M. (oral) Improvement of naked seed squash, <i>Cucurbita pepo</i> L. in Sonora, México	66
Fanourakis, N., Golfiopoulou, N. Stavrianou, A. & Tzifaki, E. (poster) Inheritance of peduncle size in the cucumber and its linkage relationships with other characters	72

Korzeniewska, A. (poster) Two independent loci for white and white-yellow corolla in <i>Cucurbita maxima</i> Duch	78
Korzeniewska, A. & Niemirowicz-Szczytt, K. (poster) Evaluation of the method for seed production by three F1 hybrids of winter squash (<i>Cucurbita maxima</i> Duch) using ethephon	82
Cuadra de la, C. & Varela, F. (poster) <i>Cucurbitaceae</i> genetic resource collection in base bank of CRF-INIA	88
Queiroz, M.A. de, Romão, R.L., Dias, R. de C.S., Assis, J.G. de A., Borges, R.M.E., Ferreira, M.A.J. da F., Ramos, S.R.R., Costa, M.S.V. & Moura, M. da C.C.L. (poster) Watermelon germplasm bank for the northeast of Brazil. An integrated approach	97
Swarup, V. & Seshadri, V.S. (poster) Genetic resources of indian cucurbits	104
Seshadri, V.S. & More, T.A. (poster) Some considerations on the diversification of muskmelons (<i>Cucumis melo</i> L.) in India	112
More, T.A. & Seshadri, V.S. (poster) Genetic resources and breeding of muskmelon (<i>Cucumis melo</i> L.) in India	120
Neykov, S. (poster) Evaluation of introduced and local salad cucumber cultivars in Bulgaria	129
Gwanama, C. & Nichterlein, K. (poster) Leaf yield components and nutritional quality of Zambian pumpkin (<i>Cucurbita</i> L.) landraces	134
Cohen, Y. (poster) 29-D, a melon inbred with multiple disease resistances	141

BIOTECHNOLOGY AND PHISIOLOGY

- Rosenman, N., Kahana, A., Xiang, Y. & Perl- Treves, R. (oral)
Expression of agamous-like genes in male and female flowers of cucumber 153
- Staub, J., Serquen, F. & Bacher, J. (oral)
Genetic map construction and map merging in cucumber (*Cucumis sativus* L.) 163
- Gaba, V., Elman, C., Perl-Treves, R. & Gray, D.J. (oral)
A suggestion for the genetic variability in the ability of *Agrobacterium*
to transform *Cucumis melo* L. 172
- Danin-Poleg, Y. Tzuri, G., Karchi, Z., Cregan, P.B. & Katzir, N. (poster)
Length polymorphism and homologies of microsatellites in several
cucurbitaceae species 179
- García-Rodríguez, E., Alvarez, J.I. & Lozano, R. (poster)
Random amplified polymorphic DNAs (RAPDs) as markers to
determining genetic relationships among *Cucumis melo* L. genotypes 187
- Guis, M., Botondi, R., Ayub, R. Ben Amor, M. Guillen, P., Latché, A.,
Bouzayen, M., Pech, J.C., Dogimont, C., Pitrat, M., Lelièvre, J. &
Albagnac, G. (oral)
Physiological and biochemical evaluation of transgenic cantaloupe charentais
melons with reduced levels of ACC oxidase 194
- Gémesné Juhasz, A. & Venczel, G. (poster)
In vitro gynogenesis induction in zucchini (*Cucurbita pepo* L.
convar. *giromontiina* Duch) lines 200
- Fellner, M., Binarová, P. & Lebeda, A. (poster)
Isolation and fusion of *Cucumis sativus* and *Cucumis melo* protoplasts 202
- Hódosy, A.S. (poster)
Bacterial infection-like lesions on parthenocarpic cucumber fruits during
ripening 210

PLANT DISEASES AND DISEASE RESISTANCES

- Alvarez, J.M. & González Torres, R. (oral)
Resistance to physiological races of *Fusarium oxysporum* f.sp. *melonis* in Spanish melon genotypes 217
- Vakalounakis, D.J. & Smardas, K. (poster)
Genetic analysis of resistance to fusarium wilt in cucumber cv. WIS-2757 223
- Ahmad, N.M., Kasrawi, M. A. & Abu-Blan, H. (oral)
Inheritance of resistance to powdery mildew disease in cucumber (*Cucumis sativus* L.) 227
- Lebeda A. & Křístková, E. (oral)
Variation in *Cucurbita* spp. for field resistance to powdery mildew 235
- Wessel-Beaver, L. & Lazo Flores, D.H. (oral)
Heritability of greenhouse and field methods for evaluating powdery mildew resistance in tropical pumpkin 241
- El-Doweny, H.H., Kamooh, A.A. & Abdel-Megeed, H.A. (poster)
Developing new cucumber cultivars (*Cucumis sativus* L.) resistant to local pathotypes of powdery mildew 248
- Angelov, D. (poster)
Results of the breeding for resistance to downy mildew (*Pseudoperonospora cubensis* (Berk et Curt) Rostow) and powdery mildew (*Sphaerotheca fuliginea* Poll.) in melons (*Cucumis melo*) 257
- Angelov, D. (poster)
Inheritance of resistance to the downy mildew in the muskmelon line 5-1-2 260
- Habdas, H., Staniaszek, M., Doruchowski, R.W. & Łakowska-Ryk, E. (poster)
Anatomical and cytological mechanism of cucumber resistance and susceptibility to downy mildew (*Pseudoperonospora cubensis* Berk, Curt) 263
- Martyn, R.D., Park, Y., Lovic, B.R. & Miller, M.E. (oral)
The role of double stranded RNA (dsRNA) in the growth and virulence of the melon pathogen, *Monosporascus cannonballus* 269

Wolff, D.W. (poster)	
Genotype fruit load, and temperature affect <i>Monosporascus</i> root rot/vine decline symptom expression in melon (<i>Cucumis melo</i> , L.)	280
Pivonia, S., Cohen, R., Katan, J., Burger, Y., Ben Ze'ev, I.S., Karchi, Z. & Edelstein, M. (oral)	
Sudden wilt of melons in southern Israel	285
Moriones, E., Luis, M., Alvarez, J.M., Batlle, A., Laviña, A., García-Arenal, F., Alonso, J.L., Bernal, J.J. & Fraile, A. (oral)	
Occurrence and distribution of viruses infecting field grown melon in Spain	291
McCreight, J.D. & Fashing-Burdette, P. (oral)	
Resistance of PI-124112 and 'Eldorado-300' melons (<i>Cucumis melo</i> L.) to papaya ringspot virus watermelon strain	298
Guerra-Sanz, J.M. & Cuadrado, I.M. (poster)	
Double-stranded RNA as a test for infectivity of 'yellowing' syndrome in cucurbits in Almería, Spain	302
Lebeda, A. & Křístková, E. (poster)	
Evaluation of <i>Cucurbita</i> spp. germplasm resistance to CMV and WMV-2	306
Campbell, R.N. & Lecoq, H. (oral)	
Melon necrotic spot virus: transmission by <i>Olpidium bornovanus</i> and vector assisted seed transmission in melon	313
Martín, B., Alvarez, J.I. & Fereres, A. (poster)	
Feeding behaviour of <i>Aphis gossypii</i> during transmission of cucumber mosaic virus on resistant and susceptible <i>Cucumis melo</i> lines	322
Dogimont, C., Bussemakers, A., Slama, S., Martin, J., Lecoq, H. & Pitrat, M. (oral)	
Diversity of resistance sources to cucurbit aphid-borne yellows luteovirus in melon and genetics of resistance	328
Bohn, G.W., Kishaba, A.N. & McCreight, J.D. (oral)	
A survey of tolerance to <i>Aphis gossypii</i> Glover in part of the world collection of <i>Cucumis melo</i> L.	334

Balkema-Boomstra, A.G. & Mollema, C. (oral) Resistance to western flower thrips in cucumber	340
Sesé, A.I.L., Soria, C. & Gómez-Guillamón, M.L. (oral) Resistance to <i>Bemisia tabaci</i> in <i>Cucumis melo</i>	344

ASSOCIATION EUROPEENNE POUR L'AMÉLIORATION DES PLANTES

Cucurbitaceae 2008

**Proceedings of the IXth EUCARPIA
Meeting on Genetics and Breeding of
Cucurbitaceae**

21- 24 May 2008 Avignon, France

Editor : Michel Pitrat, Publisher : INRA

TABLE OF CONTENTS

AUTHORS INDEX	15
<u>Session I</u> - GENETIC RESOURCES AND DIVERSITY	
General status of cucurbit genetic resources in Turkey	21
Sari N., Tan A., Yanmaz R., Yetisir H., Balkaya A., Solmaz I., and Aykas L.	
What the Roman emperor Tiberius grew in his greenhouses	33
Paris H.S., and Janick J.	
Reflections on linguistics as an aid to taxonomical identification of ancient Mediterranean cucurbits: the Piqqus of the Faqqous	43
Paris H.S., and Janick J.	
Phylogenetics of <i>Cucumis</i> (Cucurbitaceae) as understood in 2008	53
Renner S.S., and Schaefer H.	
Assessment of genetic diversity in Indian ash gourd (<i>Benincasa hispida</i>) accessions using RAPD markers	59
Pandey S., Kumar S., Rai M., Mishra U., and Singh M.	
Diversity of Spanish landraces of <i>Cucumis sativus</i> and <i>Cucurbita</i> ssp	67
Esteras C., Diez M.J., Picó B., Sifres A., Valcarcel J.V., and Nuez. F.	
<u>Session II</u> - GENETICS AND BREEDING	
Overview of the genes of watermelon	79
Wehner T.C.	
Reverse-stripe phenotypes in <i>Cucurbita pepo</i>	91
Paris H.S.	
Cucumber breeding and genomics: potentials from the research with <i>Cucumis hystrix</i>	95
Jin-Feng Chen, Long-Zheng Chen, Yong Zhuang, You-Gen Chen, and Xiao-Hui Zhou	
Agronomical, genetical and developmental characterization of <i>fs6.4</i>: a Quantitative Trait Locus controlling melon fruit shape	101
Moreno E., Fernández-Silva I., Eduardo I., Mascarell A., Álvarez J.M., Caño A., and Monforte A.J	
Near-isogenic lines of melon with different climacteric behavior as a tool to characterize fruit senescence traits.	109
Obando-Ulloa J.M., Jowkar M.M., Moreno E., Souri M.K., Dos-Santos N., Sanmartin P., Bueso M.C., Kessler M., Martínez J.A., Alarcón A., Nicolai B., Lammertyn J., García-Mas J., Monforte A.J., and Fernández-Trujillo J.P.	

One cycle of phenotypic selection combined with marker assisted selection for improving yield and quality in cucumber.	115
Behera T.K., Staub J.E., Behera S., Rao A.R., and Mason S.	

Session III - PEST AND DISEASE RESISTANCE

New concept for determination and denomination of pathotypes and races of cucurbit powdery mildew.	125
Lebeda A., Křístková E., Sedláková B., McCreight J.D., and Coffey M.D.	
Inheritance of <i>Podosphaera xanthii</i> resistance in melon line ‘90625’.	135
Pitrat M., and Besombes D.	
Conversion of an AFLP fragment into one dCAPS marker linked to powdery mildew resistance in melon.	143
Yuste-Lisbona F.J., Capel C., Capel J., Lozano R., Gómez-Guillamón M.L., and López-Sesé A.I.	
Characterization of <i>Fusarium</i> race 1.2 resistance in melon and mapping of a major QTL for this trait near a fruit netting locus.	149
Herman R., Zvirin Z., Kovalski I., Freeman S., Denisov Y., Zuri G., Katzir N., and Perl-Treves R.	
Progress in the development of Crimson Sweet-type watermelon breeding lines with resistance to <i>Acidovorax avenae</i> subsp. <i>citrulli</i>.	157
Hopkins D.L., and Levi A.	
A new view on aphid resistance in melon: the role of <i>Aphis gossypii</i> variability.	163
Boissot N., Mistral P., Chareyron V., and Dogimont C.	
Potential new sources of genetic resistance in melon to <i>Cucurbit yellow stunting disorder virus</i>.	173
McCreight J.D., and Wintermantel W.M.	
Combining QTLs for resistance to CYSDV and powdery mildew in a single cucumber line.	181
de Ruiter W., Hofstede R., de Vries J., and van den Heuvel H.	
Seedborne transmission of <i>Zucchini yellow mosaic virus</i> and <i>Cucumber mosaic virus</i> in Styrian Hulless group of <i>Cucurbita pepo</i>.	189
Tóbiás I., Szabó B., Salánki K., Sári L., Kuhlmann H., and Palkovics L.	

Session IV - GENOMICS

Current genomic resources in melon and other cucurbits.	201
Garcia-Mas J.	
Construction of a fosmid library of cucumber (<i>Cucumis sativus</i>) and comparative analyses of the <i>eIF4E</i> and <i>eIF(iso)4E</i> regions from cucumber and melon (<i>Cucumis melo</i>).	207
Havey M.J., Meyer J.D.F., Deleu W., and Garcia-Mas J.	
Identification of a CAPS marker in an <i>eIF4E</i> gene linked to <i>Zucchini yellow mosaic virus</i> resistant locus in watermelon.	213
Ling K.S., Harris K., Meyer J.D.F., Levi A., Guner N., Wehner T.C., and Havey M.J.	

Molecular diversity at the <i>Vat/Pm-W</i> resistance locus in melon.	219
Dogimont C., Chovelon V., Tual S., Boissot N., Rittener-Rüff V., Giovinazzo N., and Bendahmane A.	

Session V - GENOMICS AND FRUIT QUALITY

Melon fruit quality: a genomic approach.	231
Katzir N., Harel-Beja R., Portnoy V., Tzuri G., Koren E., Lev S., Bar E., Tadmor Y., Burger Y., Lewinsohn E., Fei Z., Giovannoni J.J., and Schaffer A.A.	
Mechanisms of melon fruit ripening and development of sensory quality.	241
Ayub R., Rombaldi C., Lucchetta L., Ginies C., Latché A., Bouzayen M., and Pech J.C.	
Sesquiterpene aroma biosynthesis in melon (<i>Cucumis melo</i>) rinds.	249
Lewinsohn E., Portnoy V., Benyamini Y., Bar E., Harel-Beja R., Gepstein S., Giovannoni J.J., Schaffer A.A., Burger J., Tadmor Y., and Katzir N.	
Expression and polymorphism of watermelon fruit ESTs.	257
Levi A., Wechter W.P., Harris K.R., Davis A.R., Fei Z., Giovannoni J.J., Trebitsh T., Salman A., Hernandez A., Thimmapuram J., Tadmor Y., Portnoy V., and Katzir N.	
The origin and mode of function of the <i>Female</i> locus in cucumber.	263
Shiber A., Gaur R.K., Rimon-Knopf R., Zelcer A., and Trebitsh T.	

POSTERS

Dioscorides's <i>bruonia melaina</i> is <i>Bryonia alba</i>, not <i>Tamus communis</i>, and an illustration labeled <i>bruonia melaina</i> in the <i>Codex Vindobonensis</i> is <i>Humulus lupulus</i> not <i>Bryonia dioica</i>	273
Renner S. S., Scarborough J., Schaefer H., Paris H.S., and Janick J.	
Cucurbitaceae genetic resources in the Czech gene bank. Current status of the collection	281
Karlová K.	
Cucurbit research in India: a retrospect	285
Rai M., Pandey S., and Kumar S.	
Genetic erosion in melon (<i>Cucumis melo</i>): a case study from Tunisia.	295
Elbekkay M., Hamza H., Haddad M., Ferchichi A., and Kik C.	
Genetic diversity of Spanish melons (<i>Cucumis melo</i>) of the Madrid provenance.	301
Escribano S., Lázaro A., and Staub J.E.	
Molecular characterization of different Italian <i>inodorus</i> melon populations based on ISSR molecular markers and preliminary SSR analysis.	307
Sestili S., Daniele A., Rosa A., Ferrari V., Belisario A., and Ficcadenti N.	
Morphological and molecular diversity of 47 melon (<i>Cucumis melo</i>) cultivars compared to an extinct landrace excavated from the 15th century.	313
Szabó Z., Gyulai G., Tóth Z., and Heszky L.	

Electrophoretic spectra of seed storage protein in <i>Cucumis melo</i> and <i>Citrullus vulgaris</i> as a tool for cultivar differentiation.....	323
Vladova R., Zamfirova M., Andreev T., and Krasteva L.	
Morphological characterization of Korean and Turkish watermelon germplasm.	327
Huh Y.C., Solmaz I., and Sari N.	
New <i>Citrullus</i> haplotypes at the <i>tRNA-Val – rps12</i> locus of cpDNA.....	335
Tóth Z., Gyulai G., Szabó Z., Gyulai F., and Heszky L.	
Relationship between genetic diversity and reproduction strategy in a sexually-propagated crop in a traditional farming system, <i>Citrullus lanatus</i> var. <i>citroides</i>.....	341
Minsart L.A., and Bertin P.	
Morphological and RAPD marker evidence of gene flow in open-pollinated populations of <i>Cucurbita moschata</i> interplanted with <i>C. argyrosperma</i>.	347
Cuevas-Marrero H., and Wessel-Beaver L.	
Development and characterization of <i>Cucumis sativus-hystrix</i> introgression lines exhibiting resistance to downy mildew.....	353
Xiao-Hui Zhou, Hong-Jian Wan, Chun-Tao Qian, and Jin-Feng Chen	
Methods of isolation of <i>Cucumis sativus</i> and <i>C. melo</i> pollen grains and their utilization in <i>in vitro</i> pollination.....	359
Skálová D., Navrátilová B., and Lebeda A.	
Effective long-term storage methods for soft X-ray irradiated pollen, and the use of storage pollen.....	365
Akutsu M., Kami D., and Sugiyama K.	
<i>In vitro</i> induction of haploid plants in unpollinated ovules, anther and microspore culture of <i>Cucumis sativus</i>.	371
Suprunova S., and Shmykova N.	
Detection of cucumber parthenogenic haploid embryos by floating of immature seeds in liquid medium.	375
Lotfi M., and Salehi S.	
Methodology of tetraploid induction plants and expression of microsatellites alleles in triploid watermelon.....	381
Omran S.A., Guerra-Sanz J.M., and Garrido Cárdenas J.A.	
Influence of honey bees brood pheromone on the production of triploid watermelon (<i>Citrullus lanatus</i>).	385
Guerra Sanz J.M., and Roldán Serrano A.	
The utilization of honey bees for the production of seeds of cucumber, cornichon type.	391
Calin M., Ambarus S., Cristea T.O., Falticeanu M., Stoian L., Popa C.M., and Dumbrava M.M.	
Cucumber hybrids type cornichon, obtained at the Vegetable Research and Development Station Bacau-Romania.....	395
Fálticeanu M., Ambarus S., Stoian L., Cristea T.O., and Calin M.	

Challenges and options in managing <i>Phytophthora</i> blight (<i>Phytophthora capsici</i>) of cucurbits	399
Babadoost M., Tian D., Islam S.Z., and Pavon C.	
Status of soil-borne phytosanitary problems encountered in melon (<i>Cucumis melo</i>) in the main producing regions of France	407
Villeneuve F., and Maignien G.	
A new gene controlling resistance to <i>Fusarium oxysporum</i> f.sp. <i>melonis</i> races 0 and 2 in melon	415
Oumouloud A., González Torres R., Arnedo-Andrés M.S., and Alvarez J.M.	
Characterization of the resistance to <i>Fusarium oxysporum</i> f.sp. <i>melonis</i> race 1.2 in <i>Cucumis melo</i> 'BG-5384'	419
Chikh-Rouhou H., González Torres R., and Alvarez J.M.	
Phenotyping root response to complex diseases: the <i>Monosporascus</i> root rot/vine decline of melons	423
Roig C., Picó B., Fita A., and Nuez F.	
Breeding of cucumber (<i>Cucumis sativus</i>) for resistance to multiple diseases and other traits	429
Kushnereva V.	
Use of sporulation and other leaf and vine traits for evaluation of resistance to downy mildew in cucumber	433
Criswell A.D., Wehner T.C., Klosinska U., and Kozik E.	
Attempt to select cucumber (<i>Cucumis sativus</i> L.) double haploid lines to downy mildew tolerance by molecular markers	441
Śmiech M., Sztangret-Wiśniewska J., Gałęcka T., Korzeniewska A., Marzec M., Kołakowska G., Piskurewicz U., and Niemirowicz-Szczytt K.	
Overview of Potyvirus Resistance in Watermelon	445
Guner N., and Wehner T.C.	
New Czech pickling cucumber hybrids - comparison of tolerance to <i>Zucchini yellow mosaic virus</i> (ZYMV)	453
Svoboda J.	
Transgenic resistance to RNA viruses in cucurbits is dependant on transgene construct and varies between viruses	457
Leibman D., Wolf D., Segev O., Raskin A., Gaur R., Saharan V., Zelcer A., and Gal-On A.	
Inheritance of tolerance to <i>Aphis gossypii</i> in <i>C. melo</i> TGR-1551 and its relation with resistance to virus transmission	459
Sarria E., Yuste-Lisbona F.J., Palomares F.J., López-Sesé A.I., and Gómez-Guillamón M.L.	
Inheritance of type I glandular trichomes in <i>Cucumis melo</i> ..	465
Palomares-Rius F.J., Sarria E., Alba J.M., and Gómez-Guillamón M.L.	
Marker assisted selection of genes and QTLs for resistance combinations to <i>Aphis gossypii</i> in melon	471
Thomas S., Mistral P., Chareyron V., and Boissot N.	

Flexibility in Cucurbitaceae breeding management with an integrated research software.....	477
Sillon J.F., Royer F., and Royer Fl.	
Comparative mapping of <i>Cucurbita moschata</i> and <i>C. pepo</i> using SSR markers.	483
Gong L., and Lelley T.	
Root architecture variation in <i>Cucurbita</i>	487
Fita A., Postma J., Picó B., Nuez F., and Lynch J..	
Preliminary research on drought resistance of wild and domestic Turkish watermelon accessions.	493
Karipçin Z., Sari N., and Kirnak H	
Potential of, and problems with, glabrous cucumber breeding.	501
Sakata Y., Yoshioka Y., and Sugiyama M.	
Detection of quantitative trait loci affecting short lateral branching in <i>Cucumis melo</i>.	505
Fukino N., Sugiyama M., Ohara T., Sainoki H., Kubo N., Hirai M., Matsumoto S., and Sakata Y.	
Detection of two QTLs for fruit weight in cucumber (<i>Cucumis sativus</i>).	511
Heang D., Sato H., Sassa H., and Koba T.	
A review of production systems on watermelon quality.	515
Davis A.R., Webber III C.L., Perkins-Veazie P., Ruso V., Lopez Galarza S., and Sakata Y.	
Improving eating quality and carotenoid content of squash.	521
Noseworthy J., and Loy B.	
Melon fruit color: more than just looks.	529
Burger Y., Tadmor Y., Lewinsohn E., Meir A., Sa'ar U., Katzir N., Paris H.S., and Schaffer A.A.	
Assessment of stability of expression of various male-sterile genes in muskmelon in sub-tropical field conditions.....	535
Dhillon N.P.S., and Kumar J.	
Gynoecey in bitter melon (<i>Momordica charantia</i>) for exploiting hybrid vigour.....	539
Dey S.S., Behera T.K., Munshi A.D., Pal A., and Rakshit S.	
Sex expression-associated RAPD markers in pointed gourd (<i>Trichosanthes dioica</i>).	543
Kumar S., Singh B.D., Sinha D.P., and Rai M.	
Pleiotropic effect of sex expression on fruit shape in melon.	551
Abdelmohsin M.E., and Pitrat M.	
Use of ethylene production as a marker for the selection of gynoecey in melon (<i>Cucumis melo</i> L.).....	557
Manzano S., Martínez C., Kraakman P., and Jamilena M.	
A recessive gene conferring ethylene insensitivity and androecy in <i>Cucurbita pepo</i>.....	563
Manzano S., Dominguez V.J., Garrido D., Gómez P., and Jamilena M.	

Isolation of <i>Cucurbita pepo</i> ethylene receptors <i>Cup-ETR1</i> and <i>Cup-ERS1</i> and functional analysis during fruit formation.	569
Payán C., Peñaranda A., Mariotti B., Garrido D., Jamilena M., and Gómez P.	
Cloning and characterisation of a <i>CTR1</i>-like gene in <i>Cucurbita pepo</i>.	575
Manzano S., Gómez P., Garrido D., and Jamilena M.	
Cloning and expression analysis of <i>rboh</i> gene encoding respiratory burst oxidase in <i>Citrullus colocynthis</i>.	581
Ying Si, Kang K.K., and Dane F.	
Affecting cucurbit hormonal status by a ZYMV transient expression vector.	587
Davidovich V., Leibman D., Gal-On A., and Perl-Treves R.	
Possible involvement of <i>CsTypA1</i> in reproductive organ development of cucumber (<i>Cucumis sativus</i>).	593
Barak M., and Trebitsh T.	
How does the first fruit inhibit younger fruit set in cucurbits?	597
Baniel A., Saraf-Levy T., and Perl-Treves R.	
The <i>FT/TFL1</i> gene family in cucumber	603
