Prior research has showed that people answer surveys is a different manner to how they would behave in reality. Many times people declare that they would buy a product that when they would not face with a real shopping situation. This is due to the fact that people do not take into account the budget constraint when declaring purchase intentions. It is easy to say one would buy an attractive product when there is no real payment involved. As the objective of this research is to obtain responses that best resemble what would happen in real purchase situations, please consider your budget constraint and real preferences when responding to the following questions where you will be able to choose between different six-egg packages.
