What is the EMI?

European Grouping of Territorial Cooperation (EGTC)

Emerged from the Interreg SUDOE programme
www.micosylva.com

Comprised of R+D public institutions and territories well known by its mycological development or potential.

Devoted to link research with the mycological sector in Europe.

An opportunity for building European projects.

Strengths

Quality Forest & Mushrooms
Mycological culture
Examples of success
R+D institutions

Weaknesses

Lack of data and reliable statistics
Lack of management (integrating fungi)
Complicated governance
Regulation not fitted for the purpose

SWOT

Threats

Climate change
Uncontrolled collecting
Market globalization
Loss of traditional gastronomy

Opportunities

Mycotourism.
The forest as a source of bioproducts
(agro food, health....)
European Cooperation

Potential
added values
in mycological
territories

Collecting permits
system; **1%**

Collecting for
fresh market;
20%

Agro Food
Industry; **40%**

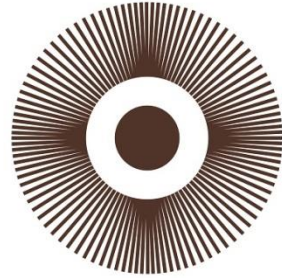

Mostly territories benefit less
than 20% of that potential ;;

Myco-tourism;
39%
