The number following the acronym of the trait refers to the soil column depth where the trait was measured: 1 refers to 0-20 cm; 2 refers to 20-40 cm; 3 refers to 40-60 cm; 4 refers to 60-80 cm; 5 refers to 80-100 cm; 6 refers to 100-120 cm; 7 refers to 120-140 cm; and 8 refers to 140-160 cm. Genotypes means followed by different letters were significantly different ($P \leq 0.05$) by Tukey's HSD test. WW, well-watered plants; and WS, water-limited plants. For the WW and WL genotypes means, bold numbers represent significant differences according to the ANOVA analysis.
